FORWARD LOOKING STATEMENTS

Certain statements contained in this Prospectus that are not statements of historical fact constitute “forward looking statements”. Investors can generally identify forward-looking statements by terminology such as “aim”, “anticipate”, “believe”, “continue”, “could”, “estimate”, “expect”, “intend”, “may”, “objective”, “plan”, “potential”, “project”, “pursue”, “shall”, “seek”, “should”, “will”, “would”, or other words or phrases of similar import. Similarly, statements that describe our strategies, objectives, plans or goals are also forward-looking statements.

All statements regarding our expected financial conditions, results of operations, business plans and prospects are forward-looking statements. These forward-looking statements include statements as to our business strategy, revenue and profitability, new business and other matters discussed in this Prospectus that are not historical facts. All forward-looking statements are subject to risks, uncertainties and assumptions about us that could cause actual results to differ materially from those contemplated by the relevant forward-looking statement.

Important factors that could cause the actual results, performances and achievements of our Company to be materially different from any of the forward-looking statements include, among others:

1. High levels of customer defaults or delays in repayment of loans could adversely affect our business, financial condition and results of operations.
2. We may not be able to recover, on a timely basis or at all, the full value of collateral or amounts which are sufficient to cover the outstanding amounts due under defaulted loans or the value of collateral may decrease, which could adversely affect our results of operations, cash flows and financial condition.
3. Our AUM comprises of unsecured loans. Our inability to recover the amounts due from customers in connection with such loans in a timely manner could adversely affect our operations and profitability.
4. Our financial performance is particularly vulnerable to interest rate volatility. If we are unable to manage interest rate risk in the future it could have an adverse effect on our net interest margin, thereby adversely affecting business and financial condition of our Company.
5. Our business operations involve transactions with borrowers with limited access to credit whose risk profile is relatively high risk. Any default from our customers could adversely affect our business, results of operations and financial condition.
6. Our business requires substantial capital, and any disruption in funding sources would have a material adverse effect on our liquidity and financial condition.
7. We have limited operating history and evolving business make it difficult to evaluate our business and future operating results on the basis of our past performance, and our future results may not meet or exceed our past performance.
8. Our inability to meet our obligations, including financial and other covenants under our financing arrangements could adversely affect our business, results of operations and financial condition.
9. We are subject to supervision and regulation by the RBI as a systemically important non - deposit accepting NBFC, and changes in RBI’s regulations governing us could adversely affect our business.
10. We may be subject to regulations in respect of provisioning for non-performing assets. If such provisions are not sufficient to provide adequate cover for loan losses that may occur, this could have an adverse effect on our financial condition, liquidity and results of operations.

For further discussion of factors that could cause our actual results to differ, see section titled “Risk Factors” on page 19.

All forward-looking statements are subject to risks, uncertainties and assumptions about our Company that could cause actual results and valuations to differ materially from those contemplated by the relevant statement. Additional factors that could cause actual results, performance or achievements of our Company to differ materially include, but are not limited to, those discussed under the sections “*Risk Factors*”, “*Industry Overview*” and “*Our Business*” and on pages 19, 108 and 129.

The forward-looking statements contained in this Prospectus are based on the beliefs of management, as well as the assumptions made by and information currently available to management. Although our Company believes that the expectations reflected in such forward-looking statements are reasonable at this time, it cannot assure investors that such expectations will prove to be correct or will hold good at all times. Given these uncertainties, investors are cautioned not to place undue reliance on such forward-looking statements. If any of these risks and uncertainties materialise, or if any of our Company’s underlying assumptions prove to be incorrect, our Company’s actual results of operations or financial condition could differ materially from that described herein as anticipated, believed, estimated or expected. All subsequent forward-looking statements attributable to our Company are expressly qualified in their entirety by reference to these cautionary statements.

By their nature, certain market risk disclosures are only estimate(s) and could be materially different from what actually occurs in the future. As a result, actual future gains or losses could materially differ from those that have been estimated. Neither our Company, its Directors, its KMPs and officers, nor any of their respective affiliates or associates or the Lead Manager have any obligation to update or otherwise revise any statements reflecting circumstances arising after the date hereof or to reflect the occurrence of underlying events, even if the underlying assumptions do not come to fruition.

In accordance with SEBI NCS Regulations, our Company and Lead Manager will ensure that investors in India are informed of material developments until the time of the grant of listing and trading permission by the Stock Exchanges.

Additional risks, which are currently unknown or now deemed immaterial, if materialise, may have a material adverse effect on our business, financial condition and results of operations in the future. The market prices of the NCDs could decline due to such risks and you may lose all or part of your investment including interest thereon.

Unless specified or quantified in the relevant risk factors below, we are not in a position to quantify the financial or other implication of any of the risks described in this section. INTERNAL RISKS

1. *High levels of customer defaults or delays in repayment of loans could adversely affect our business, financial condition and results of operations.*

Our business involves lending money to SME and MSMEs sectors which entails comparatively high risk and accordingly we are subject to customer default risks including default or delay in repayment of principal and/or interest on our loans. Our customers may default on their obligations to us as a result of various factors, including certain external factors, which may not be within our control such as developments in the Indian economy and the real estate market, movements in global markets, changes in interest rates, changes in regulations, government policies. In addition, our customers may not have formal financial statements supported by tax returns and other documents that would enable us to assess their creditworthiness, and we may not receive updated information regarding any change in the financial condition of our customers, or may receive inaccurate or incomplete information, as a result of any fraudulent misrepresentation by our customers. Additionally, some customers may intentionally default on their repayment obligations. If borrowers fail to repay loans in a timely manner or at all, our financial condition and results of operations will be adversely impacted.

In addition, our customer portfolio consists of MSMEs, who may or may not have easy access to financing from commercial banks or other organized lenders and often have limited credit history. Such borrowers generally are less financially resilient than larger corporate borrowers, and, as a result, they can be more adversely affected by declining economic conditions. In addition, we may not receive updated information regarding any change in the financial condition of our customers or may receive inaccurate or incomplete information as a result of unavailability of data or information regarding the KYC records or credit history or any fraudulent misrepresentation on the part of our customers. To the extent we are unable to successfully

manage the risks associated with lending to such consumers, it may become difficult for us to recover outstanding loan amounts from such consumers.

Customer defaults could also adversely affect our levels of NPAs and provisioning of the same, which could in turn adversely affect our operations, cash flows and profitability. Our Gross NPAs as of December 31, 2024, March 31, 2024, March 31, 2023 and March 31, 2022 stands at ₹14,984.72 lakh, ₹17,147.91 lakh, ₹9,569.05 lakh and ₹5,641.15 lakh, respectively representing 2.11%, 3.09%, 2.46% and 2.28%, respectively of the book loans and advances and our Net NPAs stands at ₹8,126.95 lakh, ₹8,921.66 lakh, ₹4,988.98 lakh and ₹4,152.32 lakh, respectively representing 1.16%, 1.64 %, 1.31% and 1.70% of the book loans and advances.

We have previously faced certain instances of customers defaulting or failing to repay dues in connection with loans or finance provided by us. We have, in certain instances, initiated legal proceedings to recover amounts due from such customers. For further information in relation to litigation, see “*Outstanding Litigations and Defaults*” beginning on page 306.

Although we believe that our risk management controls are sufficient, we cannot be certain that they will continue to be sufficient. Failure to continuously monitor the loan contracts, could adversely affect our credit portfolio which could have a material and adverse effect on our results of operations and financial condition.

2. ***We may not be able to recover, on a timely basis or at all, the full value of collateral or amounts which are sufficient to cover the outstanding amounts due under defaulted loans or the value of collateral may decrease, which could adversely affect our results of operations, cash flows and financial condition.***

Out of our Company’s AUM of ₹11,06,656.73 lakh as at December 31, 2024, 57.60% of the aggregate value of our AUM i.e., ₹6,37,436.21 lakh is secured by collaterals, 2.79% of the aggregate value of our AUM i.e., ₹30,869.86 lakh is secured by receivables, 6.02% of the aggregate value of our AUM i.e., ₹66,665.61 lakh is secured by FLDG and ₹3,71,685.05 lakh representing 33.59% of the aggregate value of our AUM is unsecured loan of which ₹1,37,477.55 lakh of business loan i.e., 12.42% of our AUM is covered through CGTMSE scheme. The value of collaterals is dependent on various factors inter-alia including (i) prevailing market conditions, (ii) the general economic and political conditions in India, (iii) growth of other sectors in which we operate, (iv) any change in statutory and / or regulatory requirements, and (v) the credit profile of our customers.

Delays in recovery, bankruptcy and foreclosure proceedings, and delays in obtaining regulatory approvals including arbitral awards for the enforcement of such collaterals may affect the valuation of the collateral. As a result, we may not be able to recover the full value of the collateral for the loans provided by our customers within the expected timeframe or at all.

The value of the security provided to us by our customers, may be subject to reduction in value on account of other extraneous reasons. Though, the customers may provide alternative security to cover shortfall, the realizable value of the security for the loans provided by us, when liquidated, may be lower than principal amount outstanding along with interest and other costs recoverable from such customers. Although we believe that we generally maintain a sufficient margin in the collateral value, if we have to enforce such charges and if at the time of such enforcement, due to adverse market conditions, the market value of the charged securities have fallen to a level where we are unable to recover the monies lent by us, along with interest accrued thereon and associated costs, the results of our operations would be adversely affected. In case of any shortfall in margins in connection with the securities charged as collaterals, we typically call upon the relevant customer to provide further collateral to make up for the deficit in such margins.

Furthermore, enforcing our legal rights by litigating against defaulting customers may be time consuming slow and potentially expensive process in India. Accordingly, it may be difficult for us to recover amounts owed by defaulting customers in a timely manner or at all.

3. *Our AUM comprises of unsecured loans. Our inability to recover the amounts due from customers in connection with such loans in a timely manner could adversely affect our operations and profitability.*

As of December 31, 2024, our AUM of unsecured loans was ₹3,71,685.05 lakh constituting 33.59% of total AUM of our Company. Since such loans are unsecured, in case of customer defaults in connection with such loans, our ability to realise the amounts due to us for such loans would be restricted to initiating legal proceedings for recovery, as we will not have the benefit of enforcing any security interest related to such loans. There can be no guarantee as to the time that would be taken for the final disposal of such legal proceedings and/or our ability to obtain favourable decisions in connection therewith.

As on December 31, 2024, our Gross NPAs for unsecured loans stands at ₹13,275.57 lakh representing 3.57% of the AUM of unsecured loans and our Net NPAs for unsecured loans stands at ₹8,674.32 lakh representing 2.37% of the AUM of unsecured loans. Because of the unsecured nature, it is essential that such loans are appropriately priced, taking into account a possible high rate of interest and all other relevant factors. In making a decision whether to extend credit to prospective customers, and the terms on which we are willing to provide credit, including the price, we rely heavily on our credit scoring models, and our credit experience gained through monitoring the performance of customers over time. Our credit scoring models are based on previous historical experience. If our credit scoring models are not redeveloped as required or if they do not perform up to target standards, we may experience increasing defaults or higher customer acquisition costs.

Further, our lending products generally do not have any definite end-use restrictions and our customers may utilise such loans for various purposes, which are often incapable of being monitored on a regular basis or at all. Further, since these loans are unsecured, our ability to realize the amounts due to us would be restricted to standard collection processes and/or initiating legal proceedings for recovery, in the event of default by such customers. We cannot assure you that we would be able to recover such amounts in a timely manner, or at all. Any failure on our part to recover the amounts due to us could have an adverse effect on our results of operations and financial condition. Further, upon the occurrence of an event of default, our ability to realise the amounts due would be restricted to initiating legal proceedings for recovery. There can be no guarantee as to the length of time it could take to conclude such legal proceedings or for the legal proceedings to result in a favourable decision for us. Moreover, since these loans are uncollateralised, there can be no assurance that we will be able to fully recover the outstanding due, or at all, even in the event of a favourable decision for us. This could adversely affect our operations and profitability.

4. *Our financial performance is particularly vulnerable to interest rate volatility. If we are unable to manage interest rate risk in the future it could have an adverse effect on our net interest margin, thereby adversely affecting business and financial condition of our Company.*

We are engaged in the lending business, primarily dealing in SME and MSME sector. Our results of operations are substantially dependent upon the level of our total income (which includes interest income from financing activities and net gain on derecognition of financial instrument). Interest income from our financing activities is the largest component of our total income and constituted 62.48 % and 64.21%, of our total income for the Fiscal 2024 and for the nine months ended December 31, 2024, respectively. Net gain on derecognition of financial instrument constituted 28.42% and 25.61% for FY 23 and 9M FY 24. As March 31, 2024, March 31, 2023 and March 31, 2022, our on-book loans and advances were ₹5,54,970.39 lakh, ₹3,89,436.20 lakh and ₹2,49,112.74 lakh respectively. We borrow and lend funds on both fixed and floating rates.

Volatility in interest rates can materially and adversely affect our financial performance. In a rising interest rate environment, if the yield on our interest-earning assets does not increase simultaneously with or to the same extent as our cost of funds, or, in a declining interest rate environment, if our cost of funds does not

decline simultaneously or to the same extent as the yield on our interest-earning assets, our net interest income and net interest margin would be adversely impacted.

Accordingly, our operations are susceptible to fluctuations in interest rates. Interest rates are highly sensitive to many factors beyond our control, including the monetary policies of the RBI, domestic and international economic and political conditions, deregulation of the financial sector in India, and other macro and micro economic factors, which have historically resulted in changes in interest rates in India.

For instance, between January 2022 and December 2024, the RBI has revised the repo rate from 4.00% to 6.50%, which has led to increase in interest rates by lenders. Fluctuations in interest rates may also adversely affect our operations. Also, in a rising interest rate environment there might be decline in the demand of loans from our customers. Further, to the extent our borrowings are linked to market interest rates, we may have to pay interest at a higher rate than companies that borrow only at fixed interest rates. Our failure to pass on increased interest rates on our borrowings to our customers, including pursuant to the measures taken by us for protection against interest rate volatility or our inability to effectively and efficiently manage interest rate variations, may result in decline of our net interest income, which would decrease our return on assets and could adversely affect our business, prospects, financial condition, results of operations and cash flows.

We do not hedge our exposure to interest rate changes except for external commercial borrowings. We cannot assure you that we can adequately manage our interest rate risk in the future. Further, changes in interest rates could affect the interest rates charged on interest earning assets and the interest rates paid on interest bearing liabilities in different ways except for external commercial borrowings wherein the Company has fully hedged its interest rate exposure through cross-currency interest rate swaps. Thus, our results of operations could be affected by changes in interest rates and the timing of any re-pricing of our liabilities compared with the re-pricing of our assets.

5. *Our business operations involve transactions with borrowers with limited access to credit whose risk profile is relatively high risk. Any default from our customers could adversely affect our business, results of operations and financial condition.*

A certain portion of our target customers, primarily in EM segment typically have limited access to credit with limited credit history whose profile carries relatively higher risk and customer default risks including delay in repayment of principal or interest on our loans. Although we have our own customised due diligence and credit analysis procedures, however, to the extent that there is limited financial information available for such customer groups and customers who do not have formal financial statements supported by tax returns, bank or credit card statements, statements of previous loan exposures or other related documents, there can be relatively higher delinquency rate for such customer profile. Our profitability depends on our ability to evaluate the right income levels of our customers, assess the credit risks and to price our loans accordingly.

Our customers may default on their obligations as a result of various factors including bankruptcy, insolvency, lack of liquidity and/or failure of the business or commercial venture in relation to which such borrowings were sanctioned. Failure to maintain sufficient credit assessment policies, particularly for small and medium enterprise borrowers, could adversely affect our credit portfolio which could have a material and adverse effect on our results of operations and financial condition.

6. *Our business requires substantial capital, and any disruption in funding sources would have a material adverse effect on our liquidity and financial condition.*

As an NBFC, our liquidity and on-going profitability are, in large part, dependent upon our timely access to, and the costs associated with, raising capital. Our funding requirements historically have been met from several sources including term loans, external commercial borrowings and working capital facilities, proceeds from non-convertible debentures, commercial papers, market linked debentures.

As at December 31, 2024 and Financial Years ended 2024, 2023 and 2022, the capital adequacy ratio (Tier I and Tier II) of our Company was 21.52%, 20.75 %, 20.23% and 34.37%, respectively. Further, our total borrowing as at December 31, 2024 and as at the Financial Years ended 2024, 2023 and 2022 was ₹ 6,15,062.20 lakh, ₹ 4,65,324.52 lakh, ₹ 3,14,893.45 lakh and ₹ 1,80,183.86 lakh respectively.

As a part of lending as a service business strategy, the Company also down sell and co-lend its loan portfolio for raising of additional funds for meeting its business requirements. We may require additional capital for our business operations from time to time. The actual amount and timing of our future capital requirements may differ from estimates as a result of, among other things, changes in business plans due to prevailing economic conditions, unanticipated expenses and regulatory changes, including any changes to RBI's monetary policies which are applicable to us or unforeseen delays in our operations. To the extent our capital requirements exceed our available resources, we will be required to seek additional debt or equity capital. Additional debt financing could increase our interest costs and require us to comply with additional restrictive covenants in our financing agreements.

Further, our business depends and will continue to depend on our ability to access diversified funding sources. Our ability to raise funds on acceptable terms, at competitive rates and timely manner continues to depend on various factors including our credit ratings, the regulatory environment and policy initiatives in India, macro and micro economic conditions, lack of liquidity in the market, investors' and/or lenders' perception of demand for debt and equity securities of NBFCs, and our current and future results of operations and financial condition. Our long-term debt is presently rated "Ind A+ / Stable", "CRISIL A/ Stable", "Acuite A/ Stable" from India Ratings and Research Private Limited, CRISIL Ratings Limited and Acuite Ratings & Research Limited respectively. Further, our short-term credit rating is presently rated "IND A 1 +", "CRISIL A1" from India Ratings and Research Private Limited and CRISIL Ratings Limited respectively.

While our borrowing costs have been competitive in the past, if we are unable to access funds at an effective cost that is comparable to or lower than our competitors, we may not be able to offer competitive interest rates for our loans. This may adversely impact our business, prospects, cash flow, results of operations and financial condition. Our ability to co-lend depends on our portfolio performance of the co-lending book, banks internal policies and parameters, their future strategy and regulatory changes.

Changes in economic and financial conditions or continuing lack of liquidity in the market could make it difficult for us to access funds at competitive rates. Such conditions may lead to a disruption in our primary funding sources at competitive costs and would have a material adverse effect on our liquidity and financial condition.

7. *We have limited operating history and evolving business make it difficult to evaluate our business and future operating results on the basis of our past performance, and our future results may not meet or exceed our past performance.*

The present management has acquired our Company in the Financial Year 2019 from the erstwhile management and forayed into MSME lending. As a result of our limited operating history under the new management, there is limited historical operating / financial information available to help prospective investors to evaluate our past performance as an entity and such data may not be indicative of future performance. Given we have limited operating history in the loan finance business, we may face significant challenges in developing and institutionalizing our procedures and policies for that business. The loan finance business would require extensive monitoring, strict compliance with KYC requirements and prudent risk management. Our growth plans will place significant demands on our operational, credit, financial and other internal risk controls, making our management of asset quality increasingly important.

Our business in each sector and overall is growing and the results and amounts set forth in our Audited Financial Statements may not provide a reliable indication of our future performance. Accordingly, you should evaluate our business and prospects in light of the risks, uncertainties and difficulties frequently encountered by both high growth companies and financial institutions that are in the early stages of development. Our failure to mitigate these risks and uncertainties successfully could materially adversely affect our business and operating results.

8. *Our inability to meet our obligations, including financial and other covenants under our financing arrangements could adversely affect our business, results of operations and financial condition.*

As at December 31, 2024, the aggregate value of our total outstanding borrowings stands at ₹ 6,15,062.20 lakh. Our ability to meet our obligations under our financing arrangements and repay our outstanding borrowings will also depend on the cash generated by our business, which depends on the timely repayment by our customers. For details in relation to our outstanding indebtedness and certain indicative terms of our borrowing facilities, see “*Disclosures on Existing Financial Indebtedness*” on page 179.

Our financing agreements include several restrictive conditions and covenants restricting certain corporate actions and we are required to take the prior approval of the lenders for taking various actions, including:

- (a) change in promoter directors or in the core management team without prior approval of the lender;
- (b) undertake any merger / acquisition / amalgamation without prior approval of the lender;
- (c) undertake any scheme of expansion / modernization / diversification / renovation (except normal capex) or sell any fixed assets during any accounting year without prior approval of the lender;
- (d) effect any change to or alter our capital structure without prior approval of the lender; and
- (e) approach capital market for mobilizing additional resources either in the form of debt or equity without prior approval of the lender.

Our failure to meet our obligations under our financing agreements, including inter alia creation of security as per terms agreed, default in payment of interest, default in redemption or repayment, default in payment of penal interest wherever applicable could have an adverse effect on our business, results of operations and financial condition. For details in relation to our outstanding indebtedness and certain indicative terms of our borrowing facilities, see “*Disclosures on Existing Financial Indebtedness*” on page 179.

Our future borrowings may also contain similar or more stringent restrictive provisions. In the event that we fail to meet our financial obligations or covenants provided under the financing agreements, the relevant lenders could declare us to be in default under the terms of our agreements and we may be immediately required to repay our borrowings, either in whole or in part, together with any related costs. We cannot assure you that, in such an event, we will have sufficient resources to repay the borrowings. Further, we are required to obtain no-objection certificates from certain existing lenders and debenture holders of the Company for the proposed Issue and listing of the NCDs. In case, any of the lender or debenture holder decides to withdraw their consent before the listing of the NCDs, the Company may be considered to have defaulted under the terms of our agreements. The negative covenants as mentioned in this risk factor and in the section “*Disclosures on Existing Financial Indebtedness*” on page 179, and other clause/covenants of a similar nature under the financing arrangements entered into by us with our lenders are in the ordinary course of business and will continue post listing of the NCDs, as is customary for such borrowing arrangements for listed and unlisted companies. Any inability to meet our obligations under such financing arrangements could adversely affect our business, results of operations and financial condition.

9. *We are subject to supervision and regulation by the RBI as a systemically important non - deposit accepting NBFC, and changes in RBI’s regulations governing us could adversely affect our business.*

We are a non - deposit accepting systemically important NBFC classified as NBFC- Middle Layer under the Master Direction – Reserve Bank of India (Non-Banking Financial Company – Scale Based Regulation) Directions, 2023 with asset size of more than ₹ 1,000 crores and therefore we are subject to the RBI’s guidelines on financial regulation of NBFCs, including capital adequacy, exposure, regulatory restrictions, limits and other prudential norms. The RBI also regulates the credit flow by banks to NBFC-ND-SIs and provides guidelines to commercial banks with respect to their investment and credit exposure norms for lending to the NBFC-ND-SIs. The RBI’s regulation of NBFC-ND-SIs may change or become more rigorous in the future which may require our Company to restructure its activities, incur additional costs or could otherwise adversely affect its business, financial performance and cash flows. In order to provide enhanced control, existing rules and regulations have been modified, new rules and regulations have been enacted and reforms have been implemented. There can be no assurance that the RBI and/or the Government will not implement further regulations or policies, including legal interpretations of existing regulations, relating to or affecting interest rates, taxation, inflation or exchange controls, or otherwise take action, that may have an adverse impact on NBFC-ND-SIs.

The laws and regulations governing the banking and financial services industry in India have become increasingly complex and cover a wide variety of issues, such as interest rates, liquidity, investments, ethical issues, money laundering and privacy. These laws and regulations can be amended, supplemented or changed at any time such that we may be required to redesign our activities and incur additional expenses to comply with such laws and regulations, which could adversely affect our business and our financial performance.

Compliance with many of the regulations applicable to our operations in India, including any restrictions on lending and other activities currently being carried out by us, involves a number of risks, particularly in markets where applicable regulations may be subject to varying interpretations. If the interpretation of the regulators and authorities varies from our interpretation, we may be subject to penalties and our business could be adversely affected. We are also subject to changes in laws, regulations and accounting principles and practices. There can be no assurance that the laws governing the financial services sector will not change in the future or that such changes or the interpretation or enforcement of existing and future laws and rules by governmental and regulatory authorities will not adversely affect our business and future financial performance.

- 10. *We may be subject to regulations in respect of provisioning for non-performing assets. If such provisions are not sufficient to provide adequate cover for loan losses that may occur, this could have an adverse effect on our financial condition, liquidity and results of operations.***

RBI guidelines prescribe the provisioning required in respect of our outstanding loan portfolio. The provisioning requirements may also require the exercise of subjective judgments of management. The RBI vide the RBI Scale Based Regulation provides for the regulatory framework governing NBFCs pertaining to provision for standard assets.

There are multiple factors that affect the level of NPAs in our Company. Various factors that are beyond our control, such as macro-economic factors (including a rise in unemployment, a sharp and sustained rise in interest rates, developments in the Indian economy, movements in global commodity markets and exchange rates), regulatory hurdles and global competition as well as customer specific factors such as wilful default and mismanagement of a customer’s operations, may result in increasing NPA levels and may have an adverse impact on the quality of our loan portfolio. If we are unable to effectively control our NPA levels in the future, we will be required to increase our provisions, which may adversely affect our profitability and financial condition. The RBI regulates certain aspects of the recovery of non-performing loans, such as the use of recovery agents. Any limitation on our ability to recover, control and reduce non-performing loans under the applicable regulatory regime or otherwise could affect our collections and ability to foreclose on existing NPAs. The level of our provisions may not be adequate to cover further increases in the amount of our non-performing assets or a decrease in the value of the underlying collateral. If we are unable to control the level of our NPAs in the future, quality of our loan portfolio could deteriorate,

our credit ratings could be downgraded and our cost of funds could increase, any of which could have a material adverse effect on our financial condition and results of operations.

11. *Our Company, Directors and Promoter are subject to certain legal proceedings and any adverse decision in such proceedings may affect our business, financial condition and results of operations.*

We, our Directors and Promoter are subject to certain legal proceedings including civil suits, consumer litigations, tax litigations etc. We incur substantial cost in defending these proceedings before a court of law. Moreover, we are unable to assure you that we or our Promoter and Directors shall be successful in any or all of these actions. In the event, we or our Promoter and Directors suffer any adverse order, our reputation may suffer and may impact our business and results of operations. We cannot assure that an adverse order by any statutory or governmental authority would not have a negative impact on our profit and financial condition.

A summary of the outstanding proceedings involving our Company, Directors and Promoter in accordance with requirements under the SEBI NCS Regulations, as disclosed in this Prospectus, to the extent quantifiable, have been set out below:

*Amount to the extent quantifiable

(1) This includes 4,534 complaints under Section 138 of Negotiable Instruments Act, 1881, as amended involving an aggregate amount of ₹ 535,83,82,993/- (to the extent quantifiable).

(2) This comprises of (i) 10460 arbitration proceedings at different stages before arbitrator, involving an aggregate amount of ₹ 10983164087/-; (ii) 430 notices under Section 13(2) of the Securitization and Reconstruction of Financial Assets and Enforcement of Security Interest Act, 2002, involving an aggregate amount of ₹ 3,15,32,54,700/-; (iii) 04 (Four) insolvency proceedings against 04(Four) corporate debtors under Section-7 of Insolvency and Bankruptcy Code, 2016 and 05 (Five) insolvency proceedings against the personal guarantor under Section 95 of the Insolvency and Bankruptcy Code, 2016.

For further details of the legal proceedings that we are subject to, please refer to “*Outstanding Litigations and Defaults*” on page 306.

12. *We are subject to regulations in relation to minimum capital adequacy requirements and reserve fund. Our inability to maintain our capital adequacy ratio could adversely affect our business.*

The Master Direction – Reserve Bank of India (Non-Banking Financial Company – Scale Based Regulation) Directions, 2023 currently require NBFCs to comply with a capital to risk (weighted) assets ratio (“**CRAR**”) consisting of Tier I and Tier II capital. Under these requirements, Tier I and Tier II capital should not be less than 15% of the sum of the NBFC’s aggregate risk-weighted assets on-balance sheet and of risk adjusted value of off-balance sheet items, as applicable. Additionally, our Tier I capital, at any point in time, shall not be less than 10%. For details, see “*Key Regulations and Policies*” on page 365. We are categorized as a ‘Middle layer’ NBFC under the SBR Framework.

As of December 2024, our CRAR was 21.52 %. As we continue to grow our loan portfolio and asset base, we will be required to raise additional Tier I and Tier II capital in order to remain in compliance with the applicable CRARs. Further, the RBI may increase its minimum CRAR threshold, which may require us to raise additional capital.

Additionally, pursuant to Section 45-IC of the Reserve Bank of India Act, 1934, every NBFC is required to create a reserve fund and transfer thereto a sum not less than 20% of its net profit every year, as disclosed in the profit and loss account before any dividend is declared. Our special reserve under Section 45-IC of the Reserve Bank of India Act, 1934, had a balance of, ₹ 5,583.91 lakh, ₹ 3,197.01 lakh and ₹ 2,401.48 lakh, as of Financial Year 2024, Financial Year 2023, and Financial Year 2022, respectively.

We cannot assure you that we will be able to raise adequate capital in the future on terms favourable to us, or at all, which may adversely affect the growth of our business. Further, the RBI may also in the future require compliance with other prudential norms and standards, which may require us to alter our business and accounting practices or take other actions that could adversely affect our business and operating results.

13. *We are subject to supervision by regulatory authorities and non-compliance with observations made by regulatory authorities during their periodic inspections could expose us to penalties and restrictions.*

As a NBFC-ND-SI (NBFC-ML), we are subject to periodic inspection by the RBI under Section 45N of the Reserve Bank of India Act, 1934 (the “**RBI Act**”), pursuant to which the RBI may inspect our books of accounts and other records for the purpose of verifying the correctness or completeness of any statement, information or particulars furnished to the RBI. Any irregularities found during such investigations by RBI could expose us to warnings, penalties and restrictions.

In its past inspection reports, the issues RBI has commented upon have been mainly operational in nature and include observations such as absence of system of internal rating of borrowers, not conducting stress tests to assess liquidity, deficiencies in loan management system, gaps in adherence to asset liability management policy. Further, RBI has observations on loan management system, outsourcing agreement, absence of software for throwing alerts for transaction inconsistent with KYC risk categorisation and non-filing of suspicious transaction report, failure to undertake failure-cause analysis and staff accountability.

In relation to the observations set out above, our Company has responded to such observations, and the actions and corrective measures to address the above observations, have been taken by our Company in timely manner.

During the course of finalization of inspection, regulatory authorities may share their findings and recommendations with us and give us an opportunity to provide justification and clarifications. Further, such regulatory authorities may also seek certain clarifications and share their findings in the ordinary course of business. We cannot assure you that these authorities will not find any deficiencies in future inspections or otherwise / the authorities will not make similar or other observations in the future. In the event we are unable to resolve such deficiencies to the satisfaction of the relevant authority, we may be restricted in our ability to conduct our business as we currently do. While we seek to comply with all

regulatory provisions applicable to us, in the event we are unable to comply with the observations made by the regulatory authorities, we could be subject to penalties and restrictions which may have an adverse effect on our business, results of operations, financial condition and reputation.

14. ***Our Company's inability to obtain, renew or maintain the statutory and regulatory permits and approvals which are required to operate its existing or future businesses may have a material adverse effect on its business, financial condition, cash flows and results of operations.***

NBFCs in India are subject to regulations and supervision by the RBI. In addition to the numerous conditions required for the registration as an NBFC with the RBI, we are also required to comply with certain other regulatory requirements imposed by the RBI from time to time. In future, there could be circumstances where our Company may be required to renew applicable permits and approvals, including its registration as a systemically important non-deposit taking NBFC and obtain new permits and approvals for its current and any proposed operations or in the event of a change in applicable law and regulations. There can be no assurance that RBI or other relevant authorities will issue any such permits or approvals in the time-frame anticipated by our Company, or at all. In addition, we require several registrations to operate our branches in the ordinary course of business. These registrations include those required to be obtained or maintained under applicable legislations governing shops and establishments, professional tax, labour-related registrations, GST registrations and trade licenses of the particular state in which we operate. Some of these approvals may have expired in the ordinary course, and our Company has either applied, or is in the process of applying for renewals of them. For an overview of the applicable regulations and the nature of key approvals and licenses to be obtained, see “*Key Regulations and Policies*” on page 365.

Failure by our Company to renew, maintain or obtain the required permits or approvals may result in an interruption of its operations and may have a material adverse effect on its business, financial condition, cash flows and results of operation.

In addition, if we establish additional branches, such branches need to be registered under the relevant shops and establishments laws of the states in which they are located. The shops and establishment laws regulate various employment conditions, including working hours, holidays and leave and overtime compensation. If we fail to obtain or retain any of these approvals or licenses, or renewals thereof, in a timely manner, or at all, our business may be adversely affected. If we fail to comply, or a regulator claims we have not complied, with any of these conditions, our certificate of registration may be suspended or cancelled and we shall not be able to carry on such activities.

15. ***The Equity Shares and Non-Convertible Debentures of our Company are listed on BSE and NSE and our Company is subject to certain obligations and reporting requirements under SEBI LODR Regulations, SEBI Insider Trading Regulations and Securities and Exchange Board of India (Issue and Listing of Non-Convertible Securities) Regulations, 2021. Any non-compliances/delay in complying with such obligations and reporting requirements may render us/our Promoter liable to prosecution and/or penalties.***

Our Company is subject to the obligations and reporting requirements under SEBI LODR Regulations, SEBI Insider Trading Regulations and Securities and Exchange Board of India (Issue and Listing of Non-Convertible Securities) Regulations, 2021 and other Regulations. Though our Company endeavours to comply with all such obligations/reporting requirements, there have been certain instances of non-compliance and delays in complying with such obligations/reporting requirements. Any such delays or non-compliance would render our Company/our Promoters to prosecution and/or penalties. Any non-compliance with the applicable laws, rules and regulations in the future may subject us to regulatory action, including penalties, suspension of trading of Equity Shares or even compulsory delisting of our Equity Shares, which may not only materially and adversely affect our business, prospects and reputation but also the shareholders. Our inability to comply with or any delay in compliance with such rules and regulations may have an adverse effect on our business, results of operations, financial condition and cash flows. In the past, stock exchanges have had levied certain penalties, see “*Outstanding Litigations and Defaults*” on

page 306, for details of such listed non-convertible securities, see “*Disclosures on Existing Financial Indebtedness*” on page 179.

16. *We face increasing competition in our business which may result in declining margins if we are unable to compete effectively.*

We face competition in all our lines of business. Our primary competitors are other NBFCs, public sector banks, private sector banks, co-operative banks, small finance banks and foreign banks and the unorganized financiers who principally operate in the markets where we operate. Banks have access to low-cost funds which enables them to enjoy higher margins and / or offer finance at lower rates. NBFCs do not have access to large quantities of low-cost deposits, a factor which can render them less competitive. In addition, interest rate deregulation and other liberalization measures affecting the small and medium enterprises, together with increased demand for capital by individuals as well as small and medium enterprises, have resulted in an increase in competition.

In addition, our target customers also borrow from money lenders and non-institutional lenders which may lend at higher rates of interest.

All of these factors have resulted in us facing increased competition from other lenders in each of our lines of businesses, including commercial banks and other NBFCs. Our ability to compete effectively will depend, to some extent, on our ability to raise low-cost funding in the future. Furthermore, as a result of increased competition in the finance sector, finance products are becoming increasingly standardized and variable interest rate and payment terms and lower processing fees are becoming increasingly common in the finance sector in India. There can be no assurance that we will be able to react effectively to these or other market developments or compete effectively with new and existing players in the increasingly competitive finance industry. Increasing competition may have an adverse effect on our net interest margin, and, if we are unable to compete successfully, our market share may decline. If we are unable to compete effectively with other participants in the finance sector, our business, future financial performance may be adversely affected.

17. *We are exposed to operational risks, including employee negligence, petty theft, burglary and embezzlement and fraud by employees, customers or third parties, which could harm our results of operations and financial position.*

We are exposed to many types of operational risks. Operational risks can result from a variety of factors, including failure to obtain proper internal authorisations, improperly documented transactions, failure of operational and information security procedures, computer systems, software or equipment, fraud, inadequate training and employee errors. We attempt to mitigate operational risk by maintaining a comprehensive system of internal controls, establishing systems and procedures to monitor transactions, maintaining key back-up procedures, undertaking regular contingency planning and providing employees with continuous training. We employ security systems, including firewalls and password encryption, designed to minimise the risk of security breaches. Although we intend to continue to implement security technology and establish operational procedures to prevent fraud, break-ins, damage and failures, there can be no assurance that these security measures will be adequate. Any failure to mitigate such risks may adversely affect our business and results of operations.

We may infrequently engage in cash collections to recover our dues. Such cash transactions may expose us to the risk of theft, burglary and misappropriation or unauthorized transactions by our employees and fraud by employees, customers or third parties. Even if such instances of misconduct may not result in any legal liabilities on our part, they could cause serious reputational or financial harm to us. Our insurance policies, security systems and measures undertaken to detect and prevent these risks may not be sufficient to prevent or deter such activities in all cases, which may adversely affect our operations and profitability. For details related to our insurance policies, see “*Our Business - Insurance*” on page 129.

Further, we may be subject to regulatory or other proceedings in connection with any unauthorized transaction, fraud or misappropriation by our representatives and employees, which could adversely affect our goodwill. We have experienced instances of fraud by our borrowers, in Fiscals 2022, 2023 and 2024. There can be no assurance that such instances will not occur in future. Any failure to mitigate such risks may adversely affect our business and results of operations. For details related to material frauds against the Company, see “*Outstanding Litigations and Defaults*” on page 306.

Furthermore, some of the collateral provided for the loans may not be adequately insured and this may expose us to a loss of value of the collateral. As a result, we may not be able to recover the full value of the collateral. Any loss of value of the collateral may have a material adverse effect on our profitability and business operations.

18. *If we are unable to manage our growth effectively, as a result our business and reputation could be adversely affected.*

We commenced our lending business to MSMEs in the financial year 2019. As December 31, 2024, we were operating from 23 prime branches and 201 EM branches with an AUM of ₹ 11,06,656.73 lakh and catering more than 1,35,000 lakh customers. Our AUM has grown from ₹2,96,890.60 lakh as at March 31, 2022 to ₹9,04,705.74 lakh as at March 31, 2024. Further, there can be no assurance that we will be able to sustain our growth strategy successfully or that we will be able to expand further or diversify our product portfolio. If we grow our AUM too rapidly or fail to make proper assessments of credit risks associated with new borrowers, a higher percentage of our AUM may become non-performing, which would have a negative impact on the quality of our assets and our financial condition.

Expanding our products or entering into new jurisdictions with new or existing products can be costly and require significant management time and attention. Additionally, as our operations grow in size, scope and complexity and our product offerings increase, we will need to enhance and upgrade our systems and infrastructure to offer an increasing number of enhanced solutions, features and functionality. The expansion of our systems and infrastructure will require us to commit substantial financial, operational and technical resources in advance of an increase in the volume of business, with no assurance that the volume of business will increase. We will need to recruit new employees, who will have to be trained and integrated into our operations. We will also have to train existing employees to adhere properly to internal controls and risk management procedures. Failure to train our employees properly may result in an increase in employee attrition rates, require additional hiring, erode the quality of customer service, divert management resources, increase our exposure to high-risk credit and impose significant costs on us.

19. *We may experience difficulties in expanding our business into new regions and markets in India and introducing our complete range of products in each of our branches.*

Factors such as competition, culture, regulatory regimes, business practices & customs and customer requirements in these new markets may differ from those in our current markets and our experience in our current markets may not be applicable to these new markets. In addition, as we enter new markets and geographical regions, we are likely to compete with other banks and financial institutions that already have a presence in those geographies and markets and are therefore more familiar with local regulations, business practices and customs and have stronger relationships with customers. Our business may be exposed to various additional challenges including obtaining necessary governmental approvals, identifying and collaborating with local business and partners with whom we may have no previous working relationship; successfully gauging market conditions in local markets with which we have no previous familiarity; attracting potential customers in a market in which we do not have significant experience or visibility; being susceptible to local taxation in additional geographical areas of India and adapting our marketing strategy and operations to different regions of India in which different languages are spoken. Expansion in new markets could also lead to a change in existing risk exposures, and the data and models we use to manage such exposures may not be as sophisticated or effective as those we use in existing markets or with existing products. Our inability to expand our current operations may adversely affect our business

prospects, financial conditions and results of operations.

20. ***Our business is based on the trust and confidence of our customers; any damage to that trust and confidence may materially and adversely affect our business, future financial performance and results of operations.***

We are dedicated to earning and maintaining the trust and confidence of our customers and we believe that the good reputation created thereby and inherent in the “U GRO” brand name is essential to our business. The reputation of our Company and/or the “U GRO” brand could be adversely affected by any threatened and/or legal proceedings and/or any negative publicity or news articles in connection with our Company or the “U GRO” brand. As such, any damage to our reputation, or that of the “U GRO” brand name, could substantially impair our ability to maintain or grow our business. If we fail to maintain brand recognition with our target customers due to any issues with our product offerings, a deterioration in service quality, or otherwise, or if any premium in value attributed to our business or to the brands under which our services are provided declines, market perception and customer acceptance of our brands may also decline. Any negative news affecting us might also affect our reputation and brand value.

21. ***Our Company has delayed in payment of statutory dues in the past under the statutory provisions of the IT Act, the Employees Provident Funds and Miscellaneous Provisions Act, 1952, Employee State Insurance Act, 1948 (“ESI Act”) and for deposit of professional tax. Such non-compliance and delayed compliance may attract penalties against our Company which could impact the financial position of us to that extent.***

There were instances of delayed compliance with certain statutory provisions under the IT Act. For further information please refer to the chapter “*Outstanding litigation and defaults*” on page 306.

While our Company have already regularized the aforesaid delays, however, there can be no assurance that the regulator may not initiate proceedings against us or that we will be able to sufficiently defend against any action initiated by regulators in relation to regulatory compliances for all instances and periods. Any adverse order passed or penalty imposed by regulators on us may adversely affect our business and results of operations.

22. ***System failures or inadequacy and security breaches in computer systems or our inability to adapt to rapid technological changes may adversely affect our business.***

Our business is increasingly dependent on our ability to process, on a daily basis, a large number of transactions. Our loan management system, financial, accounting or other data processing systems may fail to operate adequately or become disabled as a result of events that are wholly or partially beyond our control including a disruption of electrical or communications services. Our ability to operate and remain competitive will depend in part on our ability to maintain and upgrade our information technology systems on a timely and cost-effective basis. The information available to and received by our management through our existing MIS systems may not be timely and sufficient to manage risks or to plan for and respond to changes in market conditions and other developments in our operations.

We may experience difficulties in upgrading, developing and expanding our systems quickly enough to accommodate our growing customer base and range of products. Further, we may not have the resources or technical sophistication to anticipate or prevent rapidly evolving types of cyberattacks. Any failure to effectively maintain or improve or upgrade our management information systems in a timely manner could materially and adversely affect our competitiveness, financial position and results of operations.

Our operations also rely on the secure processing, storage and transmission of confidential and other information in our computer systems and networks. While we believe that we have adequate data protection and security measures required to ensure safety of such processes however, these processes and the data we maintain are susceptible to the prevalent risks as far as technology is concerned.

Our computer systems, software and networks may be vulnerable to unauthorized access, computer viruses or other malicious code and other events that could compromise data integrity and security. Any such security breaches or compromises of technology systems could result in institution of legal proceedings against us and potential imposition of penalties, which may have an adverse effect on our business and reputation. We face the threat of fraud and cyberattacks, such as hacking, phishing, trojans and other threats, attempting to exploit our network to disrupt services to customers and/or theft of sensitive internal company data or customer information. This may cause damage to our reputation and adversely impact our business and financial results. In addition, our ability to conduct business may be adversely impacted by a disruption in the infrastructure that supports our businesses and the localities in which we are located.

- 23. *Our credit ratings may not reflect accurately. Any downgrade in our credit ratings could increase borrowing costs and adversely affect our access to capital and lending markets and could also affect our interest margins, business, results of operations and financial condition.***

The cost and availability of debt capital depends in part on our short-term and long-term credit ratings. Credit ratings reflect the opinions of ratings agencies on our financial strength, operating performance, strategic position and ability to meet our obligations. Certain factors that influence our credit ratings may be outside of our control. Our long-term debt is presently rated “Ind A + / Stable”, “CRISIL A/ Stable”, “Acuite A/ Stable” from India Ratings and Research Private Limited, CRISIL Ratings Limited and Acuité Ratings & Research Limited respectively. Further, our short-term credit rating is presently rated “IND A1 +”, “CRISIL A1” from India Ratings and Research Private Limited and CRISIL Ratings Limited respectively. Securities with this rating are considered to have an adequate degree of safety regarding timely servicing of financial obligations. Such securities carry low credit risk.

The NCDs proposed to be issued under the Issue have been rated “IND A +/- Stable”) for an amount of ₹ 2,000 million by India Ratings and Research Private Limited vide their rating letter dated February 25, 2025 with rating rationale dated December 30, 2024. For rating letter, rationale and press release including the risk and key drivers mentioned therein, please refer to “Annexure A” of this Prospectus.

Ratings reflect agency’s opinion of our financial strength, operating performance, strategic position and ability to meet our obligations. As a diversified set of businesses, many of whom are dependent upon our ability to access capital, our liquidity and ongoing profitability are primarily dependent upon our timely access to, and the costs associated with raising capital. Our business is significantly dependent on funding from the debt capital markets and commercial borrowings. The demand for such funds is competitive and our ability to obtain funds at competitive rates will depend on various factors, including our ability to maintain positive credit ratings. Any downgrade in our credit ratings could increase borrowing costs and adversely affect our access to capital and debt markets, which could in turn adversely affect our interest margins, our business and results of operations and cash flows. In addition, any downgrade in our credit ratings could increase the probability that our lenders impose additional terms and conditions to any financing or refinancing arrangements we enter into in the future. Further, any downgrade in our credit ratings may also trigger an event of default or acceleration of certain of our existing/ future borrowings which may cause disruptions in the business operations.

The rating provided by India Ratings and Research Private Limited may be suspended, withdrawn or revised at any time by the assigning rating agency and should be evaluated independently of any other rating. These ratings are not a recommendation to buy, sell or hold securities and investors should take their own decision. For details in relation to rating letters and rationale for the above rating, please see “Annexure A” on page 408.

- 24. *Our measures to prevent money laundering may not be completely effective and we may be subject to scrutiny and penalties by the RBI for failure to implement effective measures. Moreover, various state government laws regulating money lending transactions could adversely affect our business, prospects, results of operations and financial condition.***

Our Company is required to comply with applicable anti-money-laundering and other regulations in India. Our measures to prevent money laundering as required by the RBI and other KYC compliance applicable in India, including the Reserve Bank of India (Know Your Customer) Master Directions, 2016 dated February 25, 2016, as amended (“**KYC Directions**”) and the adoption of anti-money laundering policies and compliance procedures in all our branches may not be completely effective. There can be no assurance that attempts to launder money using us as a vehicle will not be made. Additionally, certain states in India have enacted laws to regulate money lending transactions, which may for instance establish a maximum rate of interest that can be charged. In the event, we are required to comply with the provisions of these state money lending laws and KYC Compliances, there may be severe civil and criminal penalties for non-compliance with the relevant money lending statutes. In the event that the government of any state in India requires us to comply with the provisions of their respective state money lending laws, KYC Compliances, or imposes any penalty against us for prior non-compliance, our business and results of operations could be adversely affected.

- 25. *We depend on the accuracy and completeness of information about customers and counterparties for certain key elements of our credit assessment and risk management process. Any misrepresentation, errors in or incompleteness of such information could adversely affect our business and financial performance.***

In deciding whether to extend credit or enter into other transactions with customers, for certain key elements of the credit assessment process, we rely on information furnished to us by or on behalf of customers (including in relation to their financial transactions and past credit history). We may also rely on certain representations from our customers as to the accuracy and completeness of that information. For ascertaining the creditworthiness and encumbrances on collateral we may depend on the respective registrars and sub-registrars of assurances, credit information companies or credit bureaus, and on independent valuers in relation to the value of the collateral, and our reliance on any misleading information given, may affect our judgement of credit worthiness of potential borrowers, and the value of and title to the collateral, which may affect our business, prospects, results of operations and financial condition. We may receive inaccurate or incomplete information as a result of negligence or fraudulent misrepresentation. Our risk management measures may not be adequate to prevent or deter such activities in all cases, which may adversely affect our business prospects, financial condition and results of operations.

- 26. *Our ability to assess, monitor and manage risks inherent in our business may be different from the standards of some of our counterparts in India and in some developed countries.***

We are exposed to a variety of risks, including liquidity risk, interest rate risk, credit risk, co-lending risk, talent risk, operational risk and legal risk. The effectiveness of our risk management is limited by the quality and timeliness of available data. We have devoted resources to develop our risk management policies and procedures and aim to continue to do so in the future. For details of our strategy on risk management policies, see “*Our Business - Continue to maintain prudent risk management policies for our assets under management*” on page 129. Our strategies and risk management techniques may not be fully effective in mitigating our risks in all market environments or against all types of risk, including risks that are unidentified or unanticipated. Some methods of managing risks are based upon observed historical market behaviour. As a result, these methods may not predict future risk exposures, which could be greater than the historical measures indicated. Other risk management methods depend upon an evaluation of information regarding markets, customers or other matters. This information may not in all cases be accurate, complete, current, or properly evaluated. The management of operational, legal or regulatory risk requires, among other things, policies and procedures to properly record and verify a number of transactions and events.

Our future success will depend, in part, on our ability to respond to new technological advances and evolving the NBFC standards and practices on a cost-effective and timely basis. The development and implementation of such technology entails significant technical and business risks. There can be no assurance that we will successfully implement new technologies or adapt our transaction processing

systems to customer requirements or evolving market standards.

27. ***Our success depends in large part upon our management team and key personnel and our ability to attract, train and retain such persons. If we are unable to attract and retain talented professionals or the loss of key management personnel may have an adverse impact on our business and future financial performance.***

Our ability to sustain our rate of growth depends significantly upon our ability to manage key issues such as selecting and retaining key operations personnel, developing managerial experience to address emerging challenges and ensuring a high standard of client service. In order to be successful, we must attract, train, motivate and retain highly skilled employees, especially branch managers and product executives. However, there is significant competition in India for such personnel, which has increased in recent years as a significant number of banks and NBFCs have recently commenced operations. We compete with other similar financial institutions to attract and retain this talent pool. Our success in attracting and retaining such resources depends upon factors such as remuneration paid, range of our product offerings, pre and post-sale support provided, our reputation, our perceived stability, our financial strength, and the strength of the relationships we maintain with our intermediaries, agents and other professionals. If we fail to attract or retain such management team or key personnel, it could have a material adverse effect on our business, and future financial performance.

If we cannot hire additional qualified personnel or retain them, our ability to expand our business will be impaired and our revenue could decline. We will need to recruit new employees, who will have to be trained and integrated into our operations. We will also have to train existing employees to adhere properly to internal controls and risk management procedures. In addition, we will have to train existing employees to adhere to internal controls and risk management procedures. Failure to train and motivate our employees properly may result in an increase in employee attrition rates, divert management resources and subject us to incurring additional human resource related expenditure. Hiring and retaining qualified and skilled managers are critical to our future, as our business model depends on our credit-appraisal and asset valuation mechanism, which are personnel-driven operations. Moreover, competition for experienced employees in the finance sector can be intense. Our inability to attract and retain talented professionals, or the resignation or loss of key operations personnel, may have an adverse impact on our business and future financial performance.

28. ***We have had negative net cash flows from our operating, investing and financing activities in the recent financial years. Any negative cash flows in the future may adversely affect our results of operations and financial condition.***

We have had negative net cash flows from our operating, investing and financing activities during our last three financial years, the details of which are summarised below:

Any negative cash flows in the future may adversely affect our results of operations and financial condition. For further details, see “Annexure C - Financial Statements” on page 410.

- 29. *This Prospectus includes certain unaudited financial results, which has been subjected to limited review, in relation to our Company. Reliance on such information should, accordingly, be limited.***

- 31. *The technology-driven underwriting, risk management and collection processes on which our Company relies may not be able to effectively identify, monitor or mitigate the risks in our lending operations.***

Our technology-driven underwriting, risk management and collection processes enable our lending

operations. If any of these decision-making systems contain programming or other errors, the criteria or parameters used for the analysis of customers credit profiles are inaccurate, the risk management models can become flawed or ineffective or the customer insights developed or received for credit assessment may become incorrect or stale, the credit assessment process related to our loans could be negatively affected, resulting in incorrect approvals, incorrect denials of loans, mispriced loans or biased rejection rates for potential customers. If any of the foregoing were to occur, the performance of our credit assessment will be compromised. As a result, our business, brand, reputation, results of operations and financial condition may be adversely affected.

32. *Our insurance coverage may not be sufficient or may not adequately protect us against any or all hazards, which may adversely affect our business, results of operations, financial condition and cash flows.*

We maintain insurance coverage for our operations in normal course. Our insurance policies, however, may not provide adequate coverage in certain circumstances and are subject to certain deductibles, exclusions and limits on coverage. We cannot assure you that the terms of our insurance policies will be adequate to cover any damage or loss suffered by us or that such coverage will continue to be available on reasonable terms or will be available in sufficient amounts to cover one or more large claims, or that the insurer will not disclaim coverage as to any future claim.

We cannot assure you that any claim under the insurance policies maintained by us will be honoured fully, in part or on time, or that we have obtained sufficient insurance to cover all our losses. In addition, our insurance coverage expires from time to time. We apply for the renewal of our insurance coverage in the normal course of our business, but we cannot assure you that such renewals will be granted in a timely manner, or at acceptable cost, or at all.

There are many events, other than the ones covered in the insurance policies specified in “*Our Business – Insurance*” on page 129, that could significantly impact our operations, or expose us to third-party liabilities, for which we may not be adequately insured. To the extent that we suffer loss or damage, or successful assertion of one or more large claims against us for events for which we are not insured, or for which we did not obtain or maintain insurance, or which is not covered by insurance, exceeds our insurance coverage or where our insurance claims are rejected, the loss would have to be borne by us and our business, results of operations, financial condition and cash flows could be adversely affected. For details in relation to our insurance coverage, see “*Our Business – Insurance*” on page 129.

33. *We have included certain Non-GAAP measures related to our operations and financial performance in this Prospectus. Such Non-GAAP measures may vary from any standard methodology that is applicable across the financial services industry and may not be comparable with the financial or operational information of similar nomenclature computed and represented by other companies.*

This Prospectus includes certain non-GAAP measures, including, inter alia, Gross NPA%, Net NPA%, Net Worth, Return on Total Assets, Return on Equity, AUM, Gross Loan Book, Total Debts to total assets, etc, for further details, please see “*Our Business - Key Operational and Financial Parameters*” on page 129 which are a supplemental measure of our performance and liquidity that is not required by, or presented in accordance with, Ind AS, Indian GAAP, IFRS or US GAAP.

We consider these non-GAAP measures useful in evaluating our business and financial performances. However, these non-GAAP measures are not alternatives to any measure of performance or liquidity or as an indicator of our operating performance or liquidity. They should not be considered in isolation or construed as an alternative to cash flows, profit/ (loss) for the year or any other measure of financial performance or as an indicator of our operating performance, liquidity, profitability or cash flows generated by operating, investing or financing activities derived in accordance with Ind AS, Indian GAAP, IFRS or US GAAP. There are no standard methodologies in the industry for computing such measures, and those non-GAAP measures we included in this Prospectus may not be comparable to similarly titled measures

presented by other companies. Other companies may calculate similarly titled measures differently, limiting their usefulness as comparative measures to our data. We encourage investors and others to review our financial information in its entirety and not rely on a single financial measure

34. *All of our offices and branches are located in leased premises and non-renewal of lease agreements or their renewal on terms unfavourable to us could adversely affect our operations.*

As of December 31, 2024 all of our offices including our Registered and Corporate Office and branches are located in leased premises. As on December 31, 2024, we have 224 branches out of which lease / rent agreement for 4 branches have expired are under renewal. If any of the owners of these premises do not renew the agreements under which we occupy the premises, or if they seek to renew such agreements on terms and conditions unfavourable to us, or if they terminate the agreement, we may suffer a disruption in our operations or increased costs, or both, which may adversely affect our business and results of operations.

All or any of the leases may not be renewed on similar terms or at all, or we may be evicted from all or a number of these premises and be required to pay damages to the landlord. This may adversely impact our business and financial condition.

35. *We have in the past entered into related party transactions and may continue to do so in the future, which may potentially involve conflicts of interest with the equity shareholders.*

We have entered into certain transactions with related parties. While we believe that all such transactions have been conducted on an arm's length basis and contain commercially reasonable terms, we cannot assure you that we could not have achieved more favourable terms had such transactions been entered into with unrelated parties. It is likely that we may enter into related party transactions in the future. Although all related party transactions that we may enter into will be subject to board or shareholder approval, as necessary under the Companies Act, 2013, as amended and the SEBI LODR Regulations, we cannot assure you that such transactions, individually or in the aggregate, will not have an adverse effect on our business, prospects, results of operations and financial condition, including because of potential conflicts of interest or otherwise. In addition, our business and growth prospects may decline if we cannot benefit from our relationships with them in the future or that we could not have achieved more favourable terms if such transactions had not been entered into with related parties. For details of the related party transaction for each of the Financial Years ended March 31, 2024, 2023 and 2022, as per the requirements under the applicable accounting standards, see Note 44 of Audited Financial Statements for Fiscal 2024, Note 43 of Audited Financial Statements for Fiscal 2023, and Note 40 of Audited Financial Statements of Fiscal 2022, under "*Financial Statements*" beginning on page F-74, F-170 and F-263.

36. *We do not have access to records and data pertaining to certain historical legal and secretarial information.*

Our Company is unable to locate some of the old regulatory filings made with the RoC and/or secretarial records which pertains to its earlier years of operations. Despite having conducted search of our records and a search in the records of the RoC for the untraceable documents, which was conducted by a practicing company secretary engaged by us, we have not been able to trace the aforementioned documents. Accordingly, we have relied on other documents, including corresponding board and/or shareholder resolutions, where available, statutory registers of members, allotment and share transfer, and audited financial statements for such matters. In case of our Company, we have also been unable to trace the form filings made in relation to the change of our registered office. Though our Company has made efforts to retrieve such records however, there is no certainty that these forms or records will be available in the future. Since copies of these regulatory filings are unavailable with us, we cannot assure you that these regulatory filings were duly filed on a timely basis, or at all. Although no regulatory action/litigation is pending against us in relation to the missing documents, we cannot assure you that we will not be subject to penalties imposed by regulatory authorities in this respect. We have relied on the independent search

report by practising company secretary engaged by us and we cannot assure you of the accuracy and completeness of the report.

37. *The new bankruptcy code in India may affect our rights to recover loans from borrowers. The Insolvency and Bankruptcy Code, 2016 (“Bankruptcy Code”) was notified on August 5, 2016.*

The Bankruptcy Code offers a uniform and comprehensive insolvency legislation encompassing all companies, partnerships and individuals (other than financial firms). It allows creditors to assess the viability of a debtor as a business decision, and agree upon a plan for its revival or a speedy liquidation. The Bankruptcy Code creates a new institutional framework, consisting of a regulator, insolvency professionals, information utilities and adjudicatory mechanisms, which will facilitate a formal and time-bound insolvency resolution and liquidation process.

In case insolvency proceedings are initiated against a debtor to our Company, we may not have complete control over the recovery of amounts due to us. Under the Bankruptcy Code, upon invocation of an insolvency resolution process, a committee of creditors is constituted by the interim resolution professional, wherein each financial creditor is given a voting share proportionate to the debts owed to it. Bankruptcy Code provides a 180-day timeline which may be extended by 90 days when dealing with insolvency resolution applications. Subsequently, the insolvency resolution plan prepared by the insolvency professionals has to be approved by 66% of voting share of financial creditors, which requires sanction by the adjudicating authority and, if rejected, the adjudicating authority will pass an order for liquidation. Any resolution plan approved by committee of creditors is binding upon all creditors, even if they vote against it. In case a liquidation process is opted for, the Bankruptcy Code provides for a fixed order of priority in which proceeds from the sale of the debtor’s assets are to be distributed. Before sale proceeds are distributed to a secured creditor, they are to be distributed for the costs of the insolvency resolution and liquidation processes, debts owed to workmen and other employees, and debts owed to unsecured credits. Further, under this process, dues owed to the Central and State Governments rank at par with those owed to secured creditors. Moreover, other secured creditors may decide to opt out of the process, in which case they are permitted to realise their security interests in priority.

Accordingly, if the provisions of the Bankruptcy Code are invoked against any of the borrowers of our Company, it may affect our Company’s ability to recover our loans from the borrowers and enforcement of our Company’s rights will be subject to the Bankruptcy Code.

Further, the GoI vide notification dated March 24, 2020 (“**Notification**”) has amended section 4 of the Bankruptcy Code due the lingering impact of the COVID-19 pandemic. Pursuant to the said Notification, GoI has increased the minimum amount of default under the insolvency matters from ₹ 1,00,000 to ₹ 1,00,00,000. Therefore, the ability of our Company to initiate insolvency proceedings against the defaulters where the amount of default in an insolvency matter is less the ₹ 1,00,00,000 may impact the recovery of outstanding loans and profitability of our Company.

38. *Our results of operations could be adversely affected as a result of any disputes with our employees.*

We employ 2131 full-time employees as of December 31, 2024, and lay significant emphasis on our employees' overall welfare. However, there can be no assurance that there will not be any future disruptions in our operations due to any disputes with our employees, or that such disputes will not adversely affect our business and results of operations. We depend on our branch-level employees for sourcing, disbursements and collections and customer liaison, and significant attrition at any of our branches could adversely impact our operations. Further, in the event of a labour dispute, protracted negotiations and strike action may impair our ability to carry on our day-to-day operations, which could materially and adversely affect our business, future financial performance and results of operations.

Further, we are subject to several labour laws and regulations that change periodically, and we cannot assure you that we will continue to be able to comply with such laws and regulations in the future. Any

non-compliance by us in the future may adversely affect our business, financial condition and results of operations.

39. *Changing laws, rules and regulations and legal uncertainties, including adverse application of tax laws, may adversely affect our business, prospects and results of operations.*

The regulatory and policy environment in which we operate is evolving and subject to change. Such changes may adversely affect our business, results of operations and prospects, to the extent that we are unable to suitably respond to and comply with any such changes in applicable law and policy. For example, the Government of India implemented a comprehensive national Goods and Services Tax (“**GST**”) regime with effect from July 1, 2017, that combined multiple taxes and levies by the Central and State Governments into a unified tax structure.

Our business and financial performance could be adversely affected by any unexpected or onerous requirements or regulations resulting from the introduction of GST or any changes in laws or interpretation of existing laws, or the promulgation of new laws, rules and regulations relating to GST, as it is implemented. The Government has enacted the GAAR which have come into effect from April 1, 2017.

The Government of India has announced the union budget for Fiscal 2024, pursuant to which the Finance Bill 2024 has proposed various amendments. The Finance Bill 2024 has received assent from the President of India on March 31, 2023 and has been enacted as the Finance Act 2024 (“**Finance Act**”). There is no certainty on the impact that the Finance Act may have on our business and operations or on the industry in which we operate. We cannot predict whether any amendments made pursuant to the Finance Act would have a material adverse effect on our business, financial condition and results of operations.

Unfavourable changes in or interpretations of existing, or the promulgation of new, laws, rules and regulations including foreign investment and stamp duty laws governing our business and operations could result in us being deemed to be in contravention of such laws and may require us to apply for additional approvals. For instance, the Supreme Court of India has, in a decision clarified the components of basic wages, which need to be considered by companies while making provident fund payments. Our Company has not made relevant provisions for the same, as on date. Any such decisions in future or any further changes in interpretation of laws may have an impact on our results of operations. Further, the recent introduction of the Digital Personal Data Protection Act, 2023 (“**DPDP Act**”) may lead us to incur increased costs and other burdens relating to compliance with such new requirements, which may also require significant management time and other resources, and any failure to comply may adversely affect our business, results of operations and prospects.

Uncertainty in the applicability, interpretation or implementation of any amendment to, or change in, governing law, regulation or policy, including by reason of an absence, or a limited body, of administrative or judicial precedent may be time consuming as well as costly for us to resolve and may impact the viability of our current businesses or restrict our ability to grow our businesses in the future.

40. *Our inability to protect our intellectual property rights may prevent us from successfully marketing our products and we may infringe the intellectual property rights of others which could result in litigation.*

Our name and trademarks are significant to our business and operations. The use of our brand name or logo by third parties could adversely affect our reputation, which could in turn adversely affect our financial performance. Our current logo “”, is registered under Class 35 and 36 under the Trade Marks

Act, 1999 in the name of our Company. Further, our logo  , is registered under Class 35, 36 and 42 under Trade Marks Act, 1999 in the name of our Company. Also, we have filed application for

registration of “NON-STOP BUSINESS KARNE KI AZADI” under class 35 and 36 under Trade Marks Act, 1999.

We have also developed various technology platforms to enhance our quality of our services and operations, such as (i) GRO Plus module; (ii) GRO Chain; (iii) GRO Xstream platform for co-lending and; (iv) GRO X application to deliver embedded financing option to MSMEs. For further details please see, “*Our Business - UGRO Capital Founding Philosophy (DataTech Approach)*” on page 129. For this, our

logo  , is registered under class 9 and 36 and we have filed application for registration of  under Class 35 and 42 under the Trade Marks Act, 1999.

We have also secured patent credit scoring model, GRO Score 3.0 officially titled “*Method and System for Modelling Credit ScoreCard*”. This patent recognizes the uniqueness and effectiveness of the model in addressing the challenges faced by MSMEs and highlights our commitment to advancing credit evaluation standards in the industry.

Failure to protect our intellectual property could harm our brand and our reputation, and adversely affect our ability to compete effectively. Further, enforcing or defending our intellectual property rights, including our trademarks could result in the expenditure of significant financial and managerial resources.

41. *Our business processes a large amount of data, including personal data, and the improper collection, hosting, use or disclosure of data could harm our reputation and have an adverse effect on our business, financial condition, results of operations and cash flows.*

Our business processes a large quantity of personal data (with our users’ consent) and analyses this data to generate user and user group profiles. Our privacy policies concerning the collection, use and disclosure of personal data (and users’ rights thereto) are consented to by our customers and made accessible for their reference at any point in time. We face risks inherent in handling and protecting a large volume of data, especially user data. In particular, we face several challenges relating to data security and privacy, including but not limited to:

- (a) protecting the data in and hosted on our system, including against attacks on our system by outside parties, data leakage, fraudulent behaviour or improper use by our employees;
- (b) addressing concerns, challenges, negative publicity and litigation related to data security and privacy, collection, use and actual or perceived data sharing (including sharing among our own businesses, with business partners, vendors or regulators), and other factors that may arise from our existing businesses or new businesses and new technology; and
- (c) complying with applicable laws and regulations relating to the collection, use, storage, transfer, disclosure and security of personal data, including requests from data subjects.

The improper collection, use or disclosure of our user data could result in a loss of customers, business, partner financial institutions and other potential participants, loss of confidence or trust, litigation, regulatory investigations, penalties or actions against us, significant damage to our reputation, and have an adverse effect on our business, financial condition, results of operations and cash flows. Moreover, we share a limited amount of user data with third-party service providers in accordance with applicable laws and regulations and subject to stringent data security and privacy requirements. We also rely on certain third-party service providers in relation to the sourcing of data for potential customers. We do PAN verification with the National Securities Depository Limited (“NSDL”), and Aadhaar XML download from

the Unique Identification Authority of India, wherever deemed necessary (“UIDAI”). During the course of providing such services, customer data may be accessed. If such third-party service providers engage in activities that are negligent, fraudulent, illegal or otherwise harm the trustworthiness and security of our systems, including by improper disclosure or use of user data, or if our business partners otherwise fail to meet their data security and privacy obligations, we may be subject to user complaints and suffer reputational harm, even if the actions or activities are not related to, attributable to or caused by us, or within our control. While no regulatory or legal action has been taken against us in relation to such instances in the past, we cannot assure you that we will not be subject to any regulatory or legal action for such instances in the future.

- 42. *Negative publicity could damage our reputation and adversely impact our business and financial results. Reputational risk, or the risk to our business, earnings and capital from negative publicity, is inherent in our business.***

The reputation of the non-banking financial industry in general has been closely monitored as a result of the global financial crisis and other matters affecting the financial services industry. Negative public opinion about the non-banking finance industry generally or us specifically could materially adversely affect our ability to attract and retain customers and may expose us to litigation and regulatory action. While we have developed our brand and reputation over our history, any negative incidents or adverse publicity could rapidly erode customer trust and confidence in us, particularly if such incidents receive widespread adverse mainstream and social media publicity, or attract regulatory investigations. Negative publicity can result from our own or our third-party service providers’ actual or alleged conduct in any number of activities, including lending practices, mortgage servicing and foreclosure practices, technological practices, corporate governance, regulatory compliance, mergers and acquisitions, and related disclosure, sharing or inadequate protection of customer information, and actions taken by government regulators and community organisations in response to that conduct. Although we take steps to minimise reputational risk in dealing with customers and other constituencies, we, as a large financial services organisation with a high industry profile, are inherently exposed to this risk. Any damage to our brand or our reputation may result in withdrawal of business by our existing customers, loss of new business from potential customers.

- 43. *Fluctuations in the market value of our investments could adversely affect our results of operations and financial condition.***

Fluctuations in the market values of our investments as part of treasury management could cause us to write down the value of our assets, affect our liquidity and reduce our ability to enforce our security, which could adversely affect our result of operations and financial condition. We may not accurately identify changes in the value of our investments caused by changes in market prices, and our assessments, assumptions or estimates may prove inaccurate or not predictive of actual results.

- 44. *We may raise further borrowings and charge our assets.***

Subject to our restricted covenants, we are not barred from raising future borrowings and may charge our assets from time to time for any of such future borrowings. We also borrow the funds through issuance of non-convertible debentures from time to time and in the event if we default in repayment of the borrowings of the Company which will also trigger cross default of the Debentures, the borrowings of the Company which are secured with its assets will have a higher probability of being repaid/redeemed than the Debentures.

Risks relating to the Issue and NCDs

- 45. *The fund requirement and deployment mentioned in the Objects of the Issue have not been appraised by any bank or financial institution.***

We intend to use the net proceeds of the Issue, after meeting the expenditures of and related to the Issue,

for the purpose of onward lending, repayment of interest and principal of existing borrowings and for general corporate purposes. For further details, see “*Objects of the Issue*” at page 91. The fund requirement and deployment are based on internal management estimates and has not been appraised by any bank or financial institution. The management will have significant flexibility in applying the proceeds received by us from the Issue. Further, as per the provisions of the SEBI NCS Regulations, we are not required to appoint a monitoring agency and therefore no monitoring agency has been appointed for the Issue.

46. *There is no assurance that the NCDs issued pursuant to this Issue will be listed on BSE Limited and National Stock Exchange of India Limited in a timely manner, or at all.*

In accordance with Indian law and practice, permission for listing and trading of the NCD issued pursuant to this Issue will not be granted until after the NCDs have been issued and allotted. Approval for listing and trading will require all relevant documents authorising the issue of NCDs to be submitted. There could be a failure or delay in listing the NCDs in BSE and NSE.

47. *Payments to be made on the NCDs are subordinated to certain taxes and other liabilities preferred by law.*

In the event of bankruptcy, liquidation or winding up, there may not be sufficient assets of our Company remaining, to pay amounts due on the NCDs. The NCDs will be subordinated to certain liabilities preferred by law such as the claims of the Government on account of taxes, and certain liabilities incurred in the ordinary course of our business. In particular, in the event of bankruptcy, liquidation or winding-up, our Company’s assets will be available to pay obligations on the NCDs only after all of those liabilities that rank senior to the NCDs have been paid as per Section 327 of the Companies Act, 2013 or Section 53 of the Insolvency and Bankruptcy Code, 2016, as the case maybe. In the event of bankruptcy, liquidation or winding-up, there may not be sufficient assets remaining to pay amounts, due on the NCDs.

48. *Repayment is subject to the credit risk of the Company.*

Potential investors should be aware that receipt of the principal amount, (i.e. the redemption amount), interest thereon and any other amounts that may be due in respect of the NCDs is subject to the credit risk of the Company whereby the Investors may or may not recover all or part of the funds in case of default by the Company. Potential investors assume the risk that the Company will not be able to satisfy their obligations under the NCDs. In the event that bankruptcy proceedings or composition, scheme of arrangement or similar proceedings to avert bankruptcy are instituted by or against the Issuer, the payment of sums due on the NCDs may not be made or may be substantially reduced or delayed.

On December 14, 2021, the RBI issued a circular titled “Prompt Corrective Action (PCA) Framework for Non-Banking Financial Companies (NBFCs)” (“**PCA Framework Circular**”) to enable supervisory intervention and implement remedial measures of NBFCs, including NBFC-NDs, on the basis of tracking certain indicators such as CRAR, Tier I Capital Ratio and Net NPA Ratio.

49. *Trading of the NCDs may be limited by temporary exchange closures, broker defaults, settlement delays, strikes by brokerage firm employees and disputes.*

The Indian stock exchanges have experienced temporary exchange closures, broker defaults, settlement delays and strikes by brokerage firm employees. In addition, the governing bodies of the Indian stock exchanges have from time to time imposed restrictions on trading in certain securities, limitations on price movements and margin requirements. Furthermore, from time to time, disputes have occurred between listed companies and stock exchanges and other regulatory bodies, which in some cases may have had a negative effect on market sentiment.

50. *Changes in interest rate may affect the price of our NCD.*

Any increase in rate of interest, which frequently accompany inflation and/or a growing economy, are likely

to have a negative effect on the price of our NCDs. All securities where a fixed rate of interest is offered, such as our NCDs, are subject to price risk. The price of such securities will vary inversely with changes in prevailing interest rates, i.e., when interest rates rise, prices of fixed income securities fall and when interest rates drop, the prices increase. The extent of fall or rise in the prices is a function of the existing coupon, days to maturity and the increase or decrease in the level of prevailing interest rates. Increased rates of interest, which frequently accompany inflation and/or a growing economy, are likely to have a negative effect on the price of our NCDs.

51. *Security on our NCDs may rank pari passu with our Company's secured indebtedness in the future.*

Substantially all of our Company's current assets represented by the receivables are being used to secure our Company's debt. As of December 31, 2024, our Company's secured borrowings was ₹ 5,83,759.34 lakh. While the security on our NCDs is exclusive as of the date of this Prospectus, the terms of the NCDs do not prevent our Company from incurring additional debt subject to maintenance of minimum-security cover.

52. *There may be no active market for the NCDs on the retail debt market/capital market segment of the Stock Exchanges. As a result, the liquidity and market prices of the NCDs may fail to develop and may accordingly be adversely affected.*

There can be no assurance that an active market for the NCDs will develop. If an active market for the NCDs fails to develop or be sustained, the liquidity and market prices of the NCDs may be adversely affected. The market price of the NCDs would depend on various factors inter alia including (i) the interest rate on similar securities available in the market and the general interest rate scenario in the country, (ii) the market for listed debt securities, (iii) general economic conditions, and, (iv) our financial performance, growth prospects and results of operations. The aforementioned factors may adversely affect the liquidity and market price of the NCDs, which may trade at a discount to the price at which you purchase the NCDs and/or be relatively illiquid.

53. *The rights over the security provided will not be granted directly to holders of the NCDs.*

The rights over the security securing the obligations of our Company under the NCDs and the Trust Deed will not be granted directly to the NCD holders, but will be granted only in favour of the Debenture Trustee. As a consequence, NCD holders will not have direct security and will not be entitled to take enforcement action in respect of the security for the NCDs, except through the Debenture Trustee.

54. *The objects of the issue are not for any specified projects.*

The proceeds of this Issue will be used by the Issuer in accordance with applicable laws and not for any specified projects. For further details, see "*Objects of the Issue*" on page 91.

55. *The Debentures may not be a suitable investment for all purchasers.*

Investment in Debentures involves a significant degree of risk and is intended for sale only to those investors capable of understanding the risks involved in such instruments. Potential investors should ensure that they understand the nature of the Debentures and the extent of their exposure to risk, that they have sufficient knowledge, experience and access to professional advisers to make their own legal, tax, accounting and financial evaluation of the merits and risks of investment in the Debentures and that they consider the suitability of the Debentures as an investment in the light of their own circumstances and financial condition.

56. *The Issuer being a NBFC is not required to maintain a Debenture Redemption Reserve ("DRR").*

We are a registered NBFC in terms of the NBFC-ND-SI Directions. Pursuant to the amendment to the Companies (Share Capital and Debentures) Rules, 2014 read with Rule 16 of the SEBI NCS Regulations,

any non-banking finance company registered with Reserve Bank of India under section 450IA of the RBI Act, 1934 that intends to issue debentures to the public are no longer required to create a DRR for the purpose of redemption of the NCDs. Hence, investors shall not have the benefit of reserve funds to cover the re-payment of the principal and interest on the NCDs.

57. *Receipt of Coupon or Principal amount is subject to the Credit risk of the Issuer.*

Investors should be aware that the receipt of any coupon payment and principal amount at maturity is subject to the credit risk of the Issuer. Any stated credit rating of the Issuer reflects the independent opinion of the referenced rating agency as to the creditworthiness of the rated entity but is not a guarantee of credit quality of the Issuer. Any downgrading of the credit ratings of the Issuer by the rating agency may lower the value of the Debentures.

Potential investors should be aware that receipt of the principal amount, (i.e., the Redemption Amount) and any other amounts that may be due in respect of the NCDs is subject to the credit risk of the Issuer. Potential investors assume the risk that the Issuer will not be able to satisfy their obligations under the Debentures. In the event that bankruptcy proceedings or composition, scheme of arrangement or similar proceedings to avert bankruptcy are instituted by or against the Issuer, the payment of sums due on the Debentures may not be made or may be substantially reduced or delayed.

The payment of the principal and coupon on the NCDs is subject to the credit risk of the Issuer whereby the investors may or may not recover all or part of the principal or coupon amount of the funds invested in case of default by the Issuer. NCD Holders assume the risk that the Issuer will not be able to satisfy their obligations under the NCDs and may or may not recover all or part of the principal and/or coupon amount in case of default by the Issuer.

58. *NCD Holders may be subject to taxes arising on the sale of the NCDs.*

Sale of NCDs by any holder may give rise to tax liability, under Indian taxation laws. Investors and or subscribers are advised to consult their own tax consultant with respect to the specific tax implications arising out of sale of the NCDs. Further, tax deductible at source is applicable on interest. For details, see section titled “*Statement of Possible Tax Benefits*” on page 95. Investors and or subscribers are advised to consult their own tax consultant with respect to the specific tax implications arising out of sale of the NCDs.

59. *There may be a delay in making refund/ unblocking of funds to Applicants.*

We cannot assure you that the monies refundable to you, on account of (i) withdrawal of your applications, (ii) our failure to receive minimum subscription in connection with the Base Issue Size, (iii) withdrawal of the Issue, or (iv) failure to obtain the final approval from the BSE and NSE for listing of the NCDs, will be refunded to you in a timely manner. We, however, shall refund / unblock such monies, with the interest due and payable thereon (in case of any delays) as prescribed under applicable statutory and/or regulatory provisions.

60. *The NCD Holders may not be able to recover, on a timely basis or at all, the full value of the outstanding amounts and/or the interest accrued thereon in connection with the NCDs.*

Failure or delay to recover the expected value from a sale or disposition of the assets charged as security in connection with the NCDs could expose the holders to a potential loss. Our ability to pay interest accrued on the NCDs and/or the principal amount outstanding from time to time in connection therewith would be subject to various factors inter-alia including our financial condition, profitability and the general economic conditions in India and in the global financial markets. We cannot assure you that we would be able to repay the principal amount outstanding from time to time on the NCDs and/or the interest accrued thereon in a timely manner or at all. Although our Company will create appropriate security in favour of the Debenture Trustee for the NCD Holders on the assets adequate to ensure 110.00% asset cover for the NCDs, which shall be free from any encumbrance, the realisable value of the assets charged as security,

when liquidated, may be lower than the outstanding principal and/or interest accrued thereon in connection with the NCDs. A failure or delay to recover the expected value from a sale or disposition of the assets charged as security in connection with the NCDs could expose you to a potential loss

While the NCDs will be secured against a charge to the tune of 110% of the principal and/or interest accrued thereon in favour of Debenture Trustee, and it is the duty of the Debenture Trustee to monitor that the security is maintained, however, the possibility of recovery of 100% of the amount shall depend on the market scenario prevalent at the time of enforcement of the security.

61. *The Security may be insufficient to redeem the NCDs.*

The NCDs to be issued pursuant to the Issue will be secured by creating a pari-passu charge over the Receivables of our Company, created in favour of the Debenture Trustee, to the extent of 110% of the amount outstanding towards principal and interest payable on NCDs. In the event that our Company is unable to meet its payment and other obligations towards investors under the terms of the NCDs, the Debenture Trustee may enforce the Security in respect of the NCDs as per the terms of security documents, and other related documents. The Debenture Holder(s)' recovery in relation to the NCDs will be subject to (i) the market value of the security, (ii) finding willing buyers for the security at a price sufficient to repay the amount payable to Debenture Holder(s)' under the NCDs. The value realized from the enforcement of the transaction security may be insufficient to redeem the NCDs.

There may be fluctuations in the market values of the assets over which security has been provided by our Company, which could affect our Company's liquidity and reduce our Company's ability to enforce the security in terms of Security Documents, and consequently affect our Company's result of operations and financial condition. Our Company may not accurately identify changes in the value of assets over which security has been provided caused by changes in market prices, and our Company's assessments, assumptions or estimates may prove inaccurate.

EXTERNAL RISKS

Risks relating to India

62. *Significant differences exist between Ind-AS and other accounting principles, such as U.S. GAAP and IFRS, which may be material to the financial statements prepared and presented in accordance with Ind-AS contained in this Prospectus.*

Our summary statements of assets and liabilities as at September 30, 2024 and summary statements of profit and loss (including other comprehensive income), cash flows and changes in equity for the Fiscals 2024 have been prepared in accordance with the Indian Accounting Standards notified under Section 133 of the Companies Act, 2013, read with the Ind AS Rules and in accordance with the SEBI NCS Regulations, the SEBI Circular and the Prospectus Guidance Note.

We have not attempted to quantify the impact of US GAAP, IFRS or any other system of accounting principles on the financial data included in this Prospectus, nor do we provide a reconciliation of our financial statements to those of US GAAP, IFRS or any other accounting principles.

US GAAP and IFRS differ in significant respects from Ind AS and Indian GAAP. Accordingly, the degree to which the Financial Information included in this Prospectus will provide meaningful information is entirely dependent on the reader's level of familiarity with Ind AS, Indian GAAP and the SEBI NCS Regulations. Any reliance by persons not familiar with Indian accounting practices on the financial disclosures presented in this Prospectus should accordingly be limited.

63. *Our business is affected by prevailing economic, political and other prevailing conditions in India and the markets we currently serve.*

Our Company is incorporated in India, and all of our assets and employees are located in India. As a result, we are dependent on prevailing economic conditions in India and our results of operations are affected by factors influencing the Indian economy. Factors that may adversely affect the Indian economy, and hence our results of operations, may include:

- (a) any increase in Indian interest rates or inflation;
- (b) any exchange rate fluctuations;
- (c) any scarcity of credit or other financing in India, resulting in an adverse impact on economic conditions in India and scarcity of financing of our developments and expansions;
- (d) volatility in, and actual or perceived trends in trading activity on, India's principal stock exchanges;
- (e) changes in India's tax, trade, fiscal or monetary policies, like application of GST;
- (f) political instability, terrorism or military conflict in India or in countries in the region or globally, including in India's various neighboring countries;
- (g) occurrence of natural or man-made disasters;
- (h) infectious disease outbreaks or other serious public health concerns;
- (i) prevailing regional or global economic conditions, including in India's principal export markets;
- (j) changing regulatory landscape in relation to NBFCs and factoring business; and
- (k) other significant regulatory or economic developments in or affecting India or its financial services sectors.

Any slowdown or perceived slowdown in the Indian economy, or in specific sectors of the Indian economy, could adversely impact our business, results of operations and financial condition. Our performance and the growth of our business depend on the performance of the Indian economy and the economies of the regional markets we currently serve. These economies could be adversely affected by various factors, such as political and regulatory changes including adverse changes in liberalization policies, social disturbances, religious or communal tensions, terrorist attacks and other acts of violence or war, natural calamities, interest rates, commodity and energy prices and various other factors. Any slowdown in these economies could adversely affect the ability of our customers to afford our services, which in turn would adversely impact our business and financial performance.

64. *Financial difficulties and other problems in certain financial institutions in India could cause our business to suffer and adversely affect our results of operations.*

We are exposed to the risks of the Indian financial system, which in turn may be affected by financial difficulties and other problems faced by certain Indian financial institutions. Certain Indian financial institutions have experienced difficulties during recent years. Some co-operative banks (which tend to operate in rural sector) have also faced serious financial and liquidity crises. There has been a trend towards consolidation with weaker banks, NBFCs and HFCs being merged with stronger entities. The problems faced by individual Indian financial institutions and any instability in or difficulties faced by the Indian financial system generally could create adverse market perception about Indian financial institutions, banks and NBFCs. This in turn could adversely affect our business, our future financial performance, our shareholders' funds and the market price of our NCDs.

65. *Financial instability in other countries may cause increased volatility in Indian financial markets.*

The Indian market and economy are influenced by economic and market conditions in other countries, including conditions in the U.S., Europe and particularly in emerging market countries located in Asia. Although economic conditions are different in each country, investors' reactions to developments in one

country can have adverse effects on the securities of companies in other countries, including India. A loss of investor confidence in the financial systems of other emerging markets may cause increased volatility in Indian financial markets and, indirectly, in the Indian economy in general. Any worldwide financial instability could also have a negative impact on the Indian economy. Financial disruptions may occur again and could harm our business and our future financial performance.

Further, economic developments globally can have a significant impact on India. Concerns related to a trade war between large economies may lead to increased risk aversion and volatility in global capital markets and consequently have an impact on the Indian economy.

The global credit and equity markets have experienced substantial dislocations, liquidity disruptions and market corrections in recent years. Liquidity and credit concerns and volatility in the global credit and financial markets have increased significantly with the bankruptcy or acquisition of, and government assistance extended to, several major U.S. and European financial institutions. These and other related events have had a significant impact on the global credit and financial markets as a whole, including reduced liquidity, greater volatility, widening of credit spreads and a lack of price transparency in global credit and financial markets. In response to such developments, legislators and financial regulators in the U.S. and other jurisdictions, including India, have implemented a number of policy measures designed to add stability to the financial markets. However, the overall impact of these and other legislative and regulatory efforts on the global financial markets is uncertain, and they may not have the intended stabilizing effects. In the event that the current difficult conditions in the global credit markets continue or if there is any significant financial disruption, such conditions could have an adverse effect on our business, future financial performance and trading price of the NCDs.

In addition, China is one of India's major trading partners and there are rising concerns of a possible slowdown in the Chinese economy as well as a strained relationship with India, which could have an adverse impact on the trade relations between the two countries. These developments, or the perception that any related developments could occur, have and may continue to have a material adverse effect on global economic conditions and financial markets, and may significantly reduce global market liquidity, restrict the ability of key market participants to operate in certain financial markets or restrict our access to capital. This could have a material adverse effect on our business, financial condition and results of operation and reduce the trading price of the NCDs.

66. *Natural disasters, fires, epidemics, pandemics, acts of war, civil unrest and other events could materially and adversely affect our business.*

Natural disasters (such as typhoons, flooding and earthquakes), epidemics, pandemics such as COVID-19, acts of war, terrorist attacks and other events, many of which are beyond our control, may lead to economic instability, including in India or globally, which may in turn materially and adversely affect our business, financial condition, cash flows and results of operations.

Our operations may be adversely affected by fires, natural disasters and/or severe weather, which can result in the disruption of information systems and telecommunication services for sustained periods. They also may make it difficult or impossible for employees to reach our business locations. Damage or destruction that interrupts our provision of services could adversely affect our reputation, our relationships with our customers, our senior management team's ability to administer and supervise our business or it may cause us to incur substantial additional expenditure to repair or replace damaged equipment or rebuild parts of our branch network. Any terrorist attacks or civil unrest as well as other adverse social, economic and political events in India could have a negative effect on us. Such incidents could also create a greater perception that investment in Indian companies involves a higher degree of risk and could have an adverse effect on our business and the price of the Equity Shares.

A number of countries in Asia, including India, as well as countries in other parts of the world, are susceptible to contagious diseases and, for example, have had confirmed cases of diseases such as the

highly pathogenic H7N9, H5N1 and H1N1 strains of influenza in birds and swine and more recently, the COVID-19 virus. Certain countries in Southeast Asia have reported cases of bird-to-human transmission of avian and swine influenza, resulting in numerous human deaths. Any future outbreaks of COVID-19 virus, avian or swine influenza or a similar contagious disease could adversely affect the Indian economy and economic activity in the region and in turn have a material adverse effect on our business and the trading price of the Equity Shares. Any of the above factors may adversely affect our business, results of operation and financial condition.

67. *We face risks related to public health epidemics in India and abroad.*

Our business could be materially and adversely affected by the outbreak of public health epidemics, or the fear of such an outbreak, in India or elsewhere. In January 2020, an outbreak of a strain of coronavirus, COVID-19, which has spread globally, with cases recorded in China, Australia, Italy, Iran, Japan, South Korea, UAE, Thailand, the United States and India, among other countries. On January 30, 2020, the World Health Organization declared the COVID-19 outbreak a health emergency of international concern. Governments around the world has imposed a number of measures designed to contain the outbreak, including business closures, travel restrictions, quarantines and cancellations of gatherings and events. This in turn has impacted the operation of businesses, reduced regional travels and trade and lowered industrial production and consumption demand. If the outbreak of any of these epidemics or other severe epidemics occurs again it could have an adverse effect on economic activity worldwide, including India, and could materially and adversely affect our business, financial condition and results of operations. Similarly, any other future public health epidemics in India could materially and adversely affect our business, financial condition, results of operations and prospects.

68. *Instability of economic policies and the political situation in India could adversely affect the fortunes of the industry.*

There is no assurance that the liberalisation policies of the government will continue in the future. Protests against privatisation could slow down the pace of liberalisation and deregulation. The Government of India plays an important role by regulating the policies and regulations that govern the private sector. The current economic policies of the government may change at a later date. The pace of economic liberalisation could change and specific laws and policies affecting the industry and other policies affecting investments in our Company's business could change as well. A significant change in India's economic liberalisation and deregulation policies could disrupt business and economic conditions in India and thereby affect our Company's business. Unstable domestic as well as international political environment could impact the economic performance in the short term as well as the long term. The Government of India has pursued the economic liberalisation policies including relaxing restrictions on the private sector over the past several years. The present Government has also announced policies and taken initiatives that support continued economic liberalisation. The Government has traditionally exercised and continues to exercise a significant influence over many aspects of the Indian economy. Our Company's business may be affected not only by changes in interest rates, changes in Government policy, taxation, social and civil unrest but also by other political, economic or other developments in or affecting India.

69. *Any volatility in exchange rates may lead to a decline in India's foreign exchange reserves and may affect liquidity and interest rates in the Indian economy, which could adversely impact us.*

Foreign inflows into India have remained extremely volatile responding to concerns about the domestic macroeconomic landscape and changes in the global risk environment. The current account deficit has been attributed largely to the surge in gold and oil imports, however lately it has shrunk considerably as well due to shrinkage in trade deficit. Further, increased volatility in foreign flows may also affect monetary policy decision making.

70. *Any downgrading of India's debt rating by an international rating agency could have a negative impact on our business.*

India's sovereign debt rating could be downgraded due to several factors, including changes in tax or fiscal policy or a decline in India's foreign exchange reserves, all which are outside our control. Any adverse revisions to India's credit ratings for domestic and international debt by international rating agencies may adversely impact our ability to raise additional external financing, and the interest rates and other commercial terms at which such additional financing is available. This could have an adverse effect on our business and future financial performance and our ability to obtain financing for capital expenditures.

ANNEXURE I

STATEMENT OF POSSIBLE TAX BENEFITS AVAILABLE TO THE DEBENTURE HOLDER(S)

This Annexure is based on the provisions of the Income-tax Act, 1961 ('IT Act') in force as on the current date, after considering the amendments made by the Finance (No.2) Bill, 2024 ('FB (No.2) 2024').

The information provided below sets out the possible tax benefits available to the Debenture Holders of secured, rated, listed, redeemable non-convertible debentures ("NCDs") of UGRO Capital Limited in a summary manner only and is not a complete analysis or listing of all potential tax consequences of the subscription, ownership and disposing of the NCDs under the current tax laws presently in force in India. Several of these benefits are dependent on the Debenture Holders fulfilling the conditions prescribed under the relevant tax laws. Hence, the ability of the Debenture Holders to derive the tax benefits is dependent upon fulfilling such conditions, which, based on business imperatives a subscriber faces, may or may not choose to fulfill.

The following overview is not exhaustive or comprehensive and is not intended to be a substitute for professional advice. Subscribers are advised to consult their own tax consultant with respect to the tax implications of an investment in the NCDs, particularly in view of the fact that certain recently enacted legislation may not have a direct legal precedent or may have a different interpretation on the benefits, which an investor can avail. Neither are we suggesting nor advising the investor to invest money based on this Statement.

Taxability under the Income Tax Act

I. Common provisions applicable to both Resident and Non-Resident debenture holders:

Determination of head of income for the purpose of assessability:

The returns received by the investors from the Non-Convertible Debentures ("NCD") in the form of 'interest' and gains on transfer of the NCD, may be characterized under the following broad heads of income for the purposes of taxation under the IT Act:

- (a) Profits and gains of business or profession ("PGBP");
- (b) Capital gains ("CG"); and
- (c) Income from other sources ("IFOS").

For determining the appropriate head of income (as mentioned above) vis-à-vis the income or loss earned on/ from the NCD, it will be pertinent to analyse whether the NCD are held as 'Investments' i.e. 'Capital asset' or as 'Stock-in-trade'.

If the NCD are held as 'Stock-in-trade', interest income as well as gain or loss on its transfer will be assessed to tax under the head PGBP, whereas, if the NCD are held as 'Investments', then the interest income will be assessed to tax under the head IFOS and any gain/ loss on its transfer will be assessed to tax under the head CG.

However, as per section 2(14) of the IT Act, 'capital asset' includes, *inter alia*, securities held by a Foreign Institutional Investor ("FII") now known as Foreign Portfolio Investor ("FPI") which has invested in such securities in accordance with the regulations made under Securities and Exchange Board of India Act, 1992. Accordingly, such securities, held by an FII, will be characterised as 'capital asset' and classification as 'Stock-in-trade' shall not apply.

The investors may obtain specific advice from their tax advisors regarding the above classification and tax treatment.

II. TO THE RESIDENT DEBENTURE HOLDER

1. Interest on NCD received by Debenture Holders would be subject to income tax at the normal rates of tax in accordance with and subject to the provisions of the IT Act in both cases i.e. income shown under the head PGBP or IFOS. Interest will be assessed to Income tax on receipt basis or mercantile basis (accrual basis) depending on the method of accounting regularly employed by the NCD holder under Section 145 of the IT Act.

ECONOMIC OUTLOOK

Global Economy

Global growth, which reached 3.3% in CY23, is projected to stabilize at 3.2% for CY24 and 3.3% for CY25. The outlook for global real GDP growth indicates potential improvement as cyclical imbalances ease, bringing economic activity in major economies closer to their potential output. While global disinflation progresses, risks remain, particularly from financial market volatility and geopolitical tensions that could disrupt trade and increase commodity prices. Nonetheless, stronger public investment in advanced economies aimed at infrastructure and the green transition may stimulate private sector investment and bolster global demand. Additionally, accelerating structural reforms in both advanced and emerging markets could enhance productivity and support medium-term growth.

Indian Economic Outlook

GDP Growth and Outlook

Trend in Real Indian GDP growth rate

Note: SAE – Second Advance Estimates, FE – Final Estimate, FAE- First Advance Estimates; Source: MOSPI

India's real GDP grew by 9.2% in FY24 (Rs. 176,506 billion) which is the highest in the previous 12 years and is estimated to grow 6.5% in FY25 (Rs. 187,951 billion), driven by double digit growth particularly in the Manufacturing sector, Construction sector and Financial, Real Estate & Professional Services. In 9MFY25, GDP grew 6.1% Y-o-Y, with private consumption increasing by 7.6% and government spending increasing by 3.8% Y-o-Y.

GDP Growth Outlook

1. **FY26 GDP Outlook:** Real GDP growth is projected at 6.7%, balanced risks, driven by rural demand, improving employment, and robust business activity, despite global uncertainties.
2. **FY25 GDP Performance:** Real GDP growth for the current year is estimated at 6.4%, with a gradual recovery expected in the coming year driven by strong **agricultural** activity, improving manufacturing, and resilient services, despite a slight dip in PMI services.

Persistent geopolitical tensions, volatility in international financial markets and geo-economic fragmentation do pose risk to this outlook. Based on these considerations, the RBI, in its February 2025 monetary policy, has projected real GDP growth at 6.7% y-o-y for FY26.

Consumer Price Index

India's consumer price index (CPI), which tracks retail price inflation, stood at an average of 5.5% in FY22 which was within RBI's targeted tolerance band of 6%. However, consumer inflation started to upswing from October 2021 onwards and reached a tolerance level of 6% in January 2022. Following this, CPI reached 6.9% in March 2022.

CPI remained elevated at an average of 6.7% in FY23, above the RBI's tolerance level. However, there was some respite toward the end of the fiscal wherein the retail inflation stood at 5.7% in March 2023, tracing back to the RBI's tolerance band. Apart from a favourable base effect, the relief in retail inflation came from a moderation in food inflation.

The CPI (general) and food inflation in January 2025 was the lowest in Y-o-Y inflation after August 2024. CPI moderation was driven by decline in inflation in Vegetables, Eggs, Pulses, Education, Clothing, Health, and Cereals etc.

The CPI is primarily factored in by RBI while preparing their bi-monthly monetary policy. At the bi-monthly meeting held in February 2025, RBI projected inflation at 4.2% for FY25 with inflation during Q1FY26 at 4.2%, Q2FY25 at 4.5%, Q1FY26 at 4.6%, and Q3FY26 at 3.8% and Q4FY26 4.2%.

Considering the current inflation situation, RBI has cut the repo rate to 6.25% in the February 2025 meeting of the Monetary Policy Committee.

Further, the central bank continued its stance to be neutral. While headline inflation saw a sharp pick up due to increase in food inflation in October, it has moderated in December and January. The growth outlook is expected to be resilient but with close monitoring with the Indian rupee coming under depreciation in the current months. Core inflation is expected to rise but remain moderate. Domestic growth remains strong, driven by private consumption and investment, allowing the MPC to focus on bringing inflation down to the 4% target. As a result, the MPC decided to adopt a 'neutral' stance, monitoring inflation while supporting growth.

Overview on Key Demographic Parameters

1. Population growth and Urbanization

The trajectory of economic growth of India and private consumption is driven by socio-economic factors such as demographics and urbanization. According to the world bank, India's population in 2022 surpassed 1.42 billion slightly higher than China's population 1.41 billion and became the most populous country in the world.

Age Dependency Ratio is the ratio of dependents to the working age population, i.e., 15 to 64 years, wherein dependents are population younger than 15 and older than 64. This ratio has been on a declining trend. It was as high as 76% in 1983, which has reduced to 47% in 2023. Declining dependency means the country has an improving share of working-age population generating income, which is a good sign for the economy.

With an average age of 29, India has one of the youngest populations globally. With vast resources of young citizens entering the workforce every year, it is expected to create a 'demographic dividend.' India is home to a fifth of the world's youth demographic and this population advantage will play a critical role in economic growth.

2. Urbanization

The urban population is significantly growing in India. The urban population in India is estimated to have increased from 403 million (31.6% of total population) in 2012 to 508 million (35.9% of total population) in the year 2022. People living in Tier-2 and Tier-3 cities have greater purchasing power.

3. Increasing Per Capita Disposable Income

Gross National Disposable Income (GNDI) is a measure of the income available to the nation for final consumption and gross savings. Between the period FY14 to FY25, per capita GNDI at current prices registered a CAGR of 8.85%. More disposable income drives more consumption, thereby driving economic growth.

4. Increase in Consumer Spending

With increase in disposable income, there has been a gradual change in consumer spending behaviour as well. Private Final Consumption Expenditure (PFCE) which is measure of consumer spending has also showcased significant growth from FY14 to FY25 at a CAGR of 9.63%.

Concluding Remarks

Global economic growth faces headwinds from geopolitical tensions, volatile commodity prices, high interest rates, inflation, financial market volatility, climate change, and rising public debt. However, India's economy remains relatively strong, with an IMF forecast of 7% GDP growth in CY24, compared to the global projection of 3.2%. Key drivers include strong domestic demand, government capital expenditure, moderating inflation, and improving business confidence.

Public investment is expected to exhibit healthy growth as the government has allocated a strong capital expenditure of about Rs. 11.21 lakh crores for FY26. The private sector's intent to invest is also showing improvement as per the data announced on new project investments and resilience shown by the import of capital goods. Additionally, improvement in rural demand owing to healthy sowing, improving reservoir levels, and progress in south-west monsoon along with government's thrust on capex and other policy support will aid the investment cycle in gaining further traction.

Overview of Non-Banking Financial Institutions

Non-Banking Financial Institutions Overview

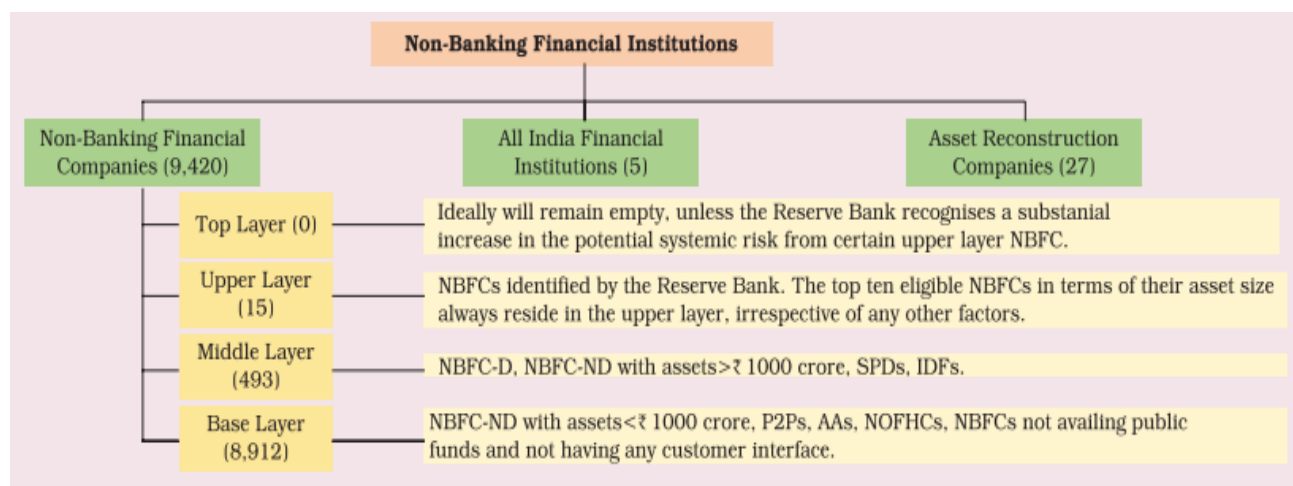

Non-banking financial institutions (NBFIs) comprise a heterogeneous group of financial intermediaries. Those under the regulatory purview of the Reserve Bank consist of the following:

1. All-India financial institutions (AIFIs) that include the National Bank for Agriculture and Rural Development (NABARD), the Export Import (EXIM) Bank of India, the Small Industries Development Bank of India (SIDBI) and the National Housing Bank (NHB) are apex financial institutions that play an important role in meeting the long-term funding requirements of agriculture and the rural sector, foreign trade, small industries, housing finance companies (HFCs), NBFCs, Micro Finance Institutions (MFIs) and other specialised segments and institutions.
2. Non-banking financial institutions (NBFIs) are government/public/private limited companies that specialise in delivering credit to a wide variety of specific segments, ranging from infrastructure to consumer durables and vehicle financing. Housing finance companies (HFCs) extend housing finance to individuals, co-operative societies, and corporate bodies and lease commercial and residential premises to support housing activity in the country.
3. Primary dealers (PDs) came into existence in 1995 and function as market makers in the government securities (G-secs) market, besides ensuring subscription to primary issuances.

Non-Banking Financial Institutions (NBFIs) play a key role in the Indian financial system by complementing and competing with banks, and by bringing efficiency and diversity into financial intermediation. NBFCs have evolved in terms of operations, heterogeneity, asset quality and profitability, as well as regulatory architecture.

Trends in Banks and NBFCs Credit in India

Credit Deployed by SCBs

Source: RBI, CareEdge Research

Note: Data are provisional

Scheduled commercial banks (SCBs) witnessed a moderate growth around 7.8% in Dec'24 over Mar'24. This growth can be attributed to a higher base effect, alongside measures implemented by the Reserve Bank of India (RBI), such as increased risk weights on non-banking financial companies (NBFCs) and consumer credit, and market concerns regarding elevated credit-to-deposit ratio (which is nearly 80% as of Dec'24, including HDFC's merger impact).

Gross Credit Deployed by NBFCs

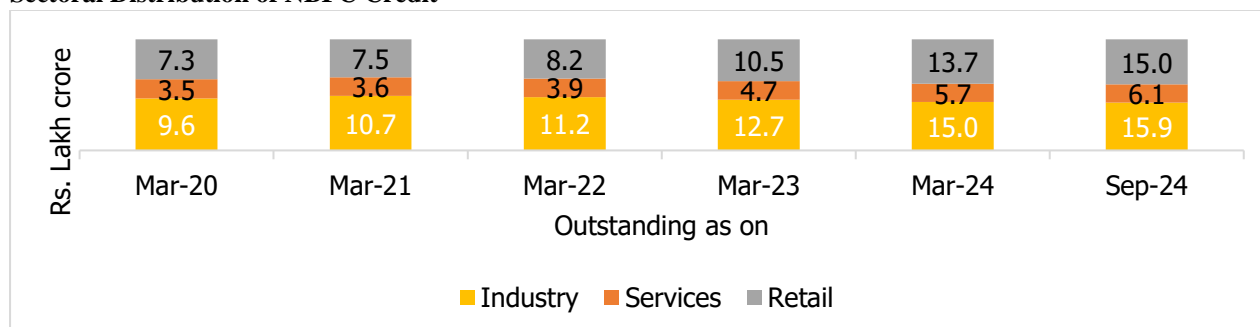

Source: RBI, CareEdge Research

Note: Data are provisional, Growth for Sep'24 is over Sep'23

As of Sept-24, the credit growth rate witnessed significant uptick of 16.2% y-o-y reaching Rs. 42.9 trillion. The continued growth trajectory of NBFCs credit is indicating its importance in India's Financial System. This growth is mainly driven by increase in demand for retail credit and demand for working capital loans amid fluctuations in commodity prices.

Sectoral Distribution of NBFC Credit

Source: RBI, CareEdge Research

The industry sector has remained the largest recipient of credit extended by NBFCs followed by retail loans, services, other non-food credit, and agriculture & allied activities. NBFCs have increased the amount of credit deployed to industry on account of improved demand for credit mainly for working capital loans amid fluctuations in commodity prices. As of Sep-24, industry credit contributed Rs. 15.9 trillion, which is around 37% of NBFCs' gross credit deployed, as per the RBI.

While NBFCs' credit to the industry is growing, their credit to services has increased marginally mainly due to increase in credit to the commercial real estate sector, transport operators, trade, and other services. As of Sep-24, as per data published by RBI, credit deployed to the service sector has hovered around Rs. 6.1 trillion that is around 14.2% of NBFCs gross credit deployed.

Retail loans comprise housing loans, vehicle loans, loans against gold, consumer durables loans and other such personal loans. In the last two years, NBFCs have been putting more emphasis on retail lending to grow their business. Retail lending has seen tremendous growth in the last two years as there has been muted credit demand from the services and industry sectors. Up to Sep-24, the credit deployed to retail loans by NBFCs has increased to over 35% of NBFCs total gross credit deployed of Rs. 42.9 trillion.

Asset Quality

Gross Non-Performing Assets (GNPA) Ratio

Source: RBI, CareEdge Research

Note: Data is provisional

The asset quality of NBFCs has seen continued improvement in the post-Covid era, supported by strong balance sheets, an increase in provisions and improved collection efficiency. Additionally, restructuring of their loan book and non-performing assets (NPA) write-offs have also aided the improvement in the asset quality of NBFCs. As of Sep-24, the GNPA ratio of NBFCs improved to 3.4% from the earlier 6.3% in Mar-20.

Going forward asset quality is expected to remain in check owing to increased provisions, decline in fresh slippages.

Capital Adequacy

Over the years, NBFCs' CRARs have improved on account of increase in the level of Tier-I capital, retained earnings and moderation in NPA. NBFCs are well capitalized, with their capital to risk-weighted asset ratio (CRAR) well above the stipulated level of 15%. As per the RBI data, CRAR was 26.1% as of Sep-24.

Resource Profile of NBFCs

As of September 2024, more than 75% of the total borrowings of NBFCs came from markets and banks. Although market borrowings have historically been the primary source of funds for NBFCs, their proportion has decreased over the years due to various challenges, including rating downgrades and liquidity issues that have restricted their ability to borrow from the market. As of Sep'24, borrowings from banks and financial institutions represented 40.7% of total borrowings, a decline from 41.9% in FY24.

Key growth drivers

Technological adoption and Co-lending arrangements:

NBFCs deploy technological solutions to develop innovative products and lower operational costs. NBFCs are increasingly leveraging technology to enhance their reach while increasing efficiency. NBFCs also collaborate with various alternative financiers and commercial banks by using the co-lending model, which enables them to diversify their income avenues and reach their targeted customer base through different channels. This co-lending model enables lenders to pool resources and distribute their risk while providing borrowers with access to diverse funding sources. Co-lending model is beneficial to banks and NBFCs as it enables them to accumulate large funds while distributing the risk associate with the funds.

Government's focus on MSME sector development

Government's focus on MSME sector: The Government recognizes role of MSME sector as one the key growth engines in India's journey of development and therefore introduced a series of measures in Union budget 2025-26 to strengthen the MSME sector. The Union budget 2025-26 estimates budgetary outlay of Ministry of MSME at Rs 23,168.15 Crores.

Some of the measures taken by Government to aid the sector are mentioned below:

- To help MSMEs scale operations and access better resources, the investment and turnover limits for classification have been increased by 2.5 times and 2 times, respectively. This is expected to improve efficiency, technological adoption, and employment generation.
- The credit guarantee cover for micro and small enterprises has been increased from Rs 5 crore to Rs 10 crore, enabling additional credit of Rs 1.5 lakh crore over five years.
- Startups will see their guarantee cover double from Rs 10 crore to Rs 20 crore, with a reduced fee of 1% for loans in 27 priority sectors.
- Exporter MSMEs will benefit from term loans up to Rs 20 crore with enhanced guaranteed cover.
- A new Fund of Funds with Rs 10,000 crore will be established to expand support for startups.
- A National Manufacturing Mission will provide policy support and roadmaps for small, medium, and large industries under the Make in India initiative.

Government's focus on infrastructure development

With the growing population, the long-term need for robust infrastructure is necessary for economic development. This generates the need for massive investments in the development and modernization of infrastructure facilities, which will not only cater to the growing demand but will also ensure competitiveness in the global market.

Some of the key government infrastructure schemes include:

- The government has announced plans for the National Monetization Pipeline (NMP) and Development Finance Institution (DFI) to improve the financing of infrastructure projects
- The government has helped the growth of urbanization through several schemes and projects, including the **Smart Cities Mission**, the **Atal Mission for Rejuvenation and Urban Transformation (AMRUT)**, and the **Pradhan Mantri Awas Yojana (Urban)**

Government's increasing efforts towards renewable power sector

The Government has been actively pursuing the growth of renewable power sector and has implemented several initiatives. These initiatives mainly focus on promoting renewable energy, strengthening distribution networks and contribute towards growth and sustainability of the power sector. In order to achieve the aim of these initiatives, power sector companies will require huge funds to set-up new renewable energy plants, upgrade the existing power plants, transmission and distribution networks and NBFCs have a significant opportunity to meet the funding requirements of power sector.

Strengthening real estate developments

Real Estate has the potential for catapulting India to the third largest construction market globally. The sector is expected to contribute 15% to the Indian economy by 2030. The recent policy reforms such as the Real Estate Act, GST and REITs are steps to reduce approval delays and are only going to strengthen the real estate and construction sector. NBFCs can play a key role in growth of real estate and construction sector by providing them adequate funds required.

Regulatory framework for NBFCs

PCA Framework

The RBI released a prompt corrective action (PCA) framework for NBFCs detailing strict action them in case their capital adequacy ratio falls or NPA levels cross a pre-defined threshold. The new framework, which earlier existed only for banks, has come into effect from 1 October 2022 based on the financial position of NBFCs on or after 31 March 2022.

Government NBFCs had provided time up to March 31, 2022, to adhere to the capital adequacy norms provided for NBFCs (Ref. Annex I of Non-Banking Financial Company - Systemically Important Non-Deposit taking Company and Deposit taking Company (Reserve Bank) Directions, 2016). Accordingly, a separate circular would be issued in due course about applicability of PCA Framework to Government NBFCs.

The PCA Framework will be reviewed after three years of being in operation.

Once an NBFC is placed under PCA, taking the NBFC out of PCA Framework and/or withdrawal of restrictions imposed under the PCA Framework will be considered basis following parameters:

- a) If no breaches in risk thresholds in any of the parameters are observed as per four continuous quarterly financial statements, one of which should be Annual Audited Financial Statement (subject to assessment by RBI); and
- b) Based on Supervisory comfort of the RBI, which includes sustenance of the profitability of NBFCs.

In addition to this, the framework requires capital-related actions, including limitations on asset growth, lowering exposure to high-risk industries, capital planning review at the board level, and filing plans for raising incremental capital. It also has credit-related measures, including lowering exposure to select industries, individuals, or sectors, developing a time-bound plan to reduce NPA, augmenting provisioning, and instituting mechanisms for loan review.

The RBI will also market risk and profitability related aspects such as extent of asset liability mismatch, restrictions, or reduction of borrowings from the debt market, restrictions on investment activities, limits on operating expenses and capital expenditure. HR and operations related aspects will also come under the purview of RBI under the PCA framework.

MSME Finance

Introduction

The micro, small and medium enterprises (“MSME”) sector is a vibrant and dynamic sector with crucial linkages to employment. The MSME sector is considered the growth engine of the Indian economy, with significant contribution to the GDP, exports, and employment generation. The sector contributes significantly to the economic and social development of the country by fostering entrepreneurship and generating large employment opportunities at comparatively lower capital cost. MSMEs are complementary to large industries as ancillary units and the sector therefore contributes significantly to the inclusive industrial development of the country.

MSMEs are widening their domain across sectors of the economy, producing a diverse range of products and services to meet demands of domestic as well as global markets.

In accordance with the provision of Micro, Small & Medium Enterprises Development (“MSMED”) Act, 2006 MSMEs are classified as follows:

Enterprise Category	Investment in Plant & Machinery or Equipment	Annual Turnover
Micro Enterprises	Does not exceed 1 crore	Does not exceed Rs. 5 crores
Small Enterprises	More than Rs. 1 crore but does not exceed Rs. 10 crores	More than Rs. 5 crores but does not exceed Rs. 50 crores
Medium Enterprises	More than Rs. 10 crores but does not exceed Rs. 50 crores	More than Rs. 50 crores but does not exceed Rs. 250 crores

In the Union Budget 2025-26, government has revised the classification, to help MSMEs scale operations and access better resources, the investment and turnover limits for classification have been increased by **2.5 times and 2 times**, respectively.

The scheme that was announced by the Government in May 2020 helped the firms to get access to more credit.

Note: The credit exposure for MSMEs is NBFCs and SCBs credit exposure to 'Micro & Small' and 'Medium' enterprises under 'Industrial Sector' only.

NBFCs mainly deploy credit to MSMEs belonging to the services and agricultural sectors. Bank credit deployed to MSMEs witnessed an improvement in FY21 and strengthened further in the FY22 on account of a resurgence in demand from MSMEs as well as support from the Central Government by way of credit guarantee. The ECLGS scheme launched in May 2020 after the pandemic hit the country in March 2020 revived credit offtake by MSMEs.

The credit extended towards MSME has increased significantly as during the pandemic, the Government encouraged banks to extend credit to MSMEs and aid them to buffer the effects of the pandemic. And as micro and small enterprises were more vulnerable, the credit towards them during the pandemic increased significantly during the FY21. Although the credit towards medium enterprises increased over the previous financial year, the growth was moderate compared to growth in credit extended to micro and small enterprises. This has continued to result in the growth of credit to MSMEs significantly in FY22. Moreover, the extension of ECLGS up to March 2023, with the guarantee cover raised by Rs 50,000 crores to a total of 5 lakh crores has also contributed in the credit growth of MSME's. As of Mar'24, the total bank credit outstanding to MSMEs crossed Rs. 10 lakh crores and the same has crossed Rs. 11 lakh crores as of Dec'24.

Credit Gap in MSME sector

There is large unmet credit demand of the MSME sector in India that NBFCs can service and grow their business

As per an IFC report published in November 2018, the total addressable credit gap in the MSME sector stood at Rs. 25.82 Lakh crore (at the end of 2017). The estimation of the credit gap was done based on the number of MSMEs, their distribution, working capital & capex requirements and formal credit to the MSME sector. The key findings were as below:

	Credit Gap estimate for the period ending 2017	Rs. Lakh Crore
A	Total MSME Demand for Debt	69.3
B	Excluded demand (estimated for new companies, sick companies that cannot be addressed immediately)	32.6
C = A - B	Total MSME Addressable Demand for Debt	36.7
D	Total Supply for Formal Credit	10.9
E = C - D	Credit Gap = Demand – Supply	25.8

The credit gap was further bifurcated into micro, small and medium based on the distribution and scale estimate for each type of entity as follows:

Figures in Rs. Lakh Crore

	Micro	Small	Medium	Total
Formal Credit Demand	11.8	21.7	3.3	36.7
Formal Credit Supply	3.9	4.8	2.2	10.9
Gap	7.9	16.9	1.1	25.8

The MSME Credit Gap at the end of 2017 was itself quite substantial. Over the last 7-year period since 2017, the size of the economy has grown significantly and the number and scale of MSMEs has also increased.

CARE Advisory has applied a similar methodology to that of the IFC report and has considered the following factors to estimate the current credit gap in the MSME sector:

- Growth in GDP and its estimated impact on the scale of MSMEs
- Increase in the number of MSMEs
- Change in the distribution of MSMEs
- Increase in formal credit support provided to the MSMEs

(Figures in Rs. Lakh Crores)

Mar'24 (Estimates)	Credit Demand	Credit Supply	Credit Gap
Micro	19.8	7.2	12.6
Small	31.5	11.7	19.8
Medium	10.3	9.2	1.2
Total MSME	61.6	28.0	33.6
Mar'27 (Projections)	Credit Demand	Credit Supply	Credit Gap
Micro	25.0	10.4	14.7
Small	42.2	16.9	25.3
Medium	13.9	13.2	0.6
Total MSME	81.1	40.4	40.6

Share of Banks & Non-Banks in MSME lending

The MSME sector is underpenetrated by NBFCs and there is a huge unmet credit demand in the sector, primarily due to lack of documentation and credit history required to access to financing from formal banking channels. There is also a significant gap between the original credit requirement and the actual credit exposure of formal channels to MSMEs, which provides a huge opportunity in MSME lending.

Note: The credit exposure for MSMEs is NBFCs and SCBs credit exposure to 'Micro & Small' and 'Medium' enterprises under 'Industrial Sector' only.

Government Policies and Initiatives

The Government of India has designed various policies for the growth of MSMEs in the country.

- Revamp of the credit guarantee scheme for MSMEs w.e.f April 2023 through fund infusion of Rs 9,000 crore in the corpus. This will facilitate additional collateral-free guaranteed credit of Rs 2 lakh crore and reduces the cost of the credit by 1%.
- Announcement on introducing an Entity DigiLocker for MSMEs to store and share documents securely in an online mode.
- Launched on July 1, 2020, the Udyam Registration Portal serves as a pivotal platform for facilitating the registration of enterprises across India. The portal encourages enterprises previously registered under the Udyog Aadhaar Memorandum and Entrepreneurship Memorandum-II to migrate to this new system. It offers a free, paperless, and self-declaration-based registration process, eliminating the need for document uploads, thus simplifying the formalization of businesses.
- Under Vivad se Vishwas, 95% of the forfeited amount relating to bid or performance security is to be returned by the government in case of failure by MSMEs to execute contracts during the Covid period.
- PM Vishwakarma KAushal Samman (PM VIKAS) for traditional artisans to integrate them with the MSME value chain and assist them in improving the quality, scale and reach of their products. PM Vishwakarma is fully funded by the Government of India with an initial outlay of Rs. 13,000 crores for 2023-24 to 2027-28.
- The Ministry of MSME, Government of India, notified the Public Procurement Policy for Micro and Small Enterprises (MSEs) in 2012. This policy mandates that 25% of annual procurement by Central Ministries, Departments, and Central Public Sector Enterprises (CPSEs) must be sourced from MSEs. Within this 25%, 4% is reserved for MSEs owned by Scheduled Castes/Scheduled Tribes (SC/ST), and 3% is reserved for MSEs owned by women entrepreneurs. Additionally, 358 items are exclusively reserved for procurement from MSEs.
- Emergency Credit Line Guarantee Scheme (ECLGS) provided for collateral free loans to existing eligible borrowers with 100% guarantee in respect of the eligible amount as per the Scheme guidelines. As per the State Bank of India's research report dated 23.01.2023 on ECLGS, almost 14.6 lakh MSME accounts, of which about 93.8% of the accounts were in MSE categories, were saved.
- Collateral free loan up to a limit of Rs. 500 lakhs (w.e.f. 01.04.2023) to Micro and Small Enterprises with guaranteed coverage up to 85 % for various categories of loan through Credit Guarantee Fund Trust for Micro and Small Enterprises (CGTMSE) under Credit Guarantee Scheme. Since inception till 30.06.2024, a total of 91,76,248 guarantees amounting to Rs 6,78,326.81 crore have been issued.
- The Ministry of MSME implemented a Special Credit Linked Capital Subsidy Scheme (SCLCSS) under National SC-ST Hub (NSSH) to promote setting up of new enterprises by aspiring entrepreneurs and capacity building of existing MSEs for enhanced participation of SC/ST entrepreneurs in public procurement. All SC-ST owned MSEs of manufacturing as well as service sectors are eligible for 25% subsidy under SCLCSS component of NSSH for procurement of Plant & Machinery and equipment through institutional credit.

Recent Developments in the sector

- The Union Budget 2025-26 introduces a series of measures aimed at strengthening the MSME sector by enhancing credit access, supporting first-time entrepreneurs, and promoting labour-intensive industries.
- To help MSMEs scale operations and access better resources, the investment and turnover limits for classification have been increased by **2.5 times and 2 times**, respectively. This is expected to improve efficiency, technological adoption, and employment generation.

- A National Institute of Food Technology, Entrepreneurship and Management will be established in Bihar to boost food processing industries in the eastern region.

In conclusion, the Union Budget 2025-26 presents a strategic plan to strengthen the MSME sector in India, with a focus on improving credit access, supporting entrepreneurship, and implementing sector-specific initiatives. Key changes in classification criteria, along with enhanced credit guarantees and tailored financial products such as credit cards for micro-enterprises, are expected to drive growth and innovation. The emphasis on industries like footwear, leather, and toys aims to create jobs and enhance India's competitiveness in global markets. SWOT Analysis

Strength	Weakness
-----------------	-----------------

<ul style="list-style-type: none"> • Adapt quickly to market changes due to smaller size and simpler operations. • Contribute around 30% to GDP and employ over 257 million people, vital to India's growth. • Operate in sectors like manufacturing, agriculture, services, and retail, spanning India's economy. 	<ul style="list-style-type: none"> • Shortage of skilled labour affects quality and efficiency. • Many MSMEs lack modern technology and infrastructure, limiting productivity and competitiveness. • Limited bargaining power with customers and suppliers as compared to large corporates.
Opportunity	Threat
<ul style="list-style-type: none"> • Digital tools, e-commerce, and automation can improve efficiency, lower costs, and expand markets. • With government support, MSMEs can access global markets, especially in textiles, handicrafts, and agro-products. 	<ul style="list-style-type: none"> • MSMEs rely on larger firms for raw materials, making them vulnerable to supply chain disruptions. • Larger companies threaten MSMEs with superior scale, technology, and resources.

Outlook

The MSME sector is the driving force of the Indian economy and has major potential to spread industrialization across the economy. The sector faces number of challenges such as limited access to finance, inadequate availability of skilled labour, and insufficient infrastructure. Along with this, rising interest rates by RBI to control inflation has become a hindrance to the growth in sector. This has led to increase in borrowing cost for MSMEs and further made the situation difficult for accessing credit. This high rise in borrowing cost is expected to impact the cash flows and profitability of MSMEs. Although, this sector has many challenges, the growth potential remains high.

MSMEs employ many people making the sector a key contributor to the economic development of the country. The sheer number of work force engaged also results in this sector receiving good Government support and benefits. Apart from Government initiatives, the improved use of digital solutions adopted during the pandemic (such as easy payments and marketing through digital platforms) increased demand for finished products have strengthen the MSMEs and resulted in recovery of their business.

The MSME sector is expected to help India achieve its goal of becoming a USD 5 trillion economy. In addition to this, MSMEs are expected to contribute more than 40% of India's nominal gross domestic product (GDP) by financial year 2025 for which it will require immense support from the Government, institutions, and banks.

UGRO Capital Founding Philosophy (DataTech Approach)

Back in 2018, post the change in management and control of our Company, the new management was of the opinion that MSME lending market would gravitate towards being an on-tap consumer lending market and this would be heavily facilitated by the rapid scale of digitalization prevalent in the Indian economy. The management planned that the digital wave would standardise the data through India stack framework including the OCEN and AAN applications which would support new age digital lending business models for MSMEs and in turn reduce customer turn around time.

Our Company has adopted a datatech approach attempting to leverage the shift towards digital ecosystem to make MSME lending more efficient and to design an underwriting framework by complementing the existing lending infrastructure which is (a) scalable and (b) templated. This problem statement internally was coined as “*To solve the Unsolved*” and translated in our mission statement.

Our Company’s focus on data analytics and strong technology architecture allows for customized sourcing platforms for each sourcing channel. We have developed various technology platforms to enhance our quality of our services and operations, such as (i) GRO Plus module which has improved intermediated sourcing, (ii) GRO Chain, a supply chain financing platform with automated end to end approval and flow of invoices, (iii) GRO Xstream platform for co-lending, an upstream and downstream integration with fintechs and liability providers and (iv) GRO X application to deliver embedded financing option to MSMEs.

Our Company's credit scoring underwriting model GRO Score 3.0 ("**GRO Score**") has helped in growth of our business and as on December 31, 2024 the Company is in collaboration with 16 co-lending partners, 55+ lenders, 60+ fintech, 10+ Green anchors, 70+ OEMs and 730+ GRO partners to provide data-backed customized finance solutions to over 1,00,000 MSMEs across India.

Our Differentiated Underwriting Approach

We comparatively analysed cash flow-based banking analysis and repayment behaviour of the customer to the sector in which it operates to draw sharper insight about our target segment. This approach enabled us to apply the same basic lending principles with much more data rigor thereby adding to the robustness of decision making. Our Company devised a way in which the homogeneity of cash flows could be measured and observed that the same also translated to homogeneity of repayment behaviour and this become the denominator on which statistical rules could be applied. This framework was labelled as GRO Score.

During Financial Year 2024, the credit scoring model was upgraded to GRO Score 3.0. The credit scoring model GRO Score 3.0 a statistical framework using AI / ML driven statistical model to risk rank customers is revolutionizing the MSME credit by providing on-tap financing like consumer financing in India.

GRO Score reduces dependency on any specific bureau data and provides higher approval rates for similar or lesser risk cases. Being an AI / ML based model, as the pool of loans grow and our Company gathers more data about customers, we will be able to seamlessly integrate the same into our systems to improve our credit decisions.

The scorecards were developed through the big data analysis of small business borrower profiles and are recalibrated at designated intervals to maintain their accuracy. It takes into consideration 25,000+ parameters from banking and bureau records to categorize a particular customer across 5 bands of "A" to "E" with "A" being the least risky and "E" being the riskiest.

The results of our scoring model have tested positive for both sets of customers i.e. the ones to whom we have lent money and ones to whom we have not. It has also withstood two waves of Covid-19 pandemic, thereby establishing its robustness. As at December 31, 2024, March 31, 2024, March 31, 2023 and March 31, 2022 our Gross NPA amounted to ₹14,984.72 lakh ₹17,147.91 lakh, ₹9,569.05 lakh and ₹5,641.15 lakh respectively constituting 2.11%, 3.09 %, 2.46 % and 2.28 % of our loan book.

We have adopted the data tripod underwriting methodology. We have developed our credit scoring model, GRO Score which used the data of GST, banking and bureau and our underwriters use our sector and sub sector based templated underwriting scorecard. Today when a customer approaches us, we only seek information relating to GST number, GST statement, and his bank statement along with the KYC documents and post that the system takes over and extracts various kinds of parameters, viz. such as the borrowing mix, the frequency and magnitude of defaults, history of high-cost debt, obligation as a percentage of turnover, etc. which have all been customized to our kind of target segment and this has been back tested and is administered on a real time basis.

Our Company's underwriting is specialized while maintaining standardization of the credit process across its branches. All processes in the underwriting process until in-principle decisioning are fully automated. In addition to the scorecards and the policy statements, the underwriting process also follows the traditional 'touch and feel' based checking processes including legal verification, fraud control unit check, field investigation and valuation, which is done by a combination of internal teams and outsourced agencies to ensure the sanctity of the loan portfolio is maintained.

Use of Technology

Our Company's lending related aspects and process is supported by technology which spans across all stages of the customer's journey including origination, distribution, credit, analytics, operations and collections. We have (a) 25+ API integrations (b) bank, CIBIL and GST statement analyzers (c) automated policy approvals (d) machine learning OCR technology (e) in house Business Rule Engine (BRE) (f) customized sourcing modules and (g) data pool for 360-degree customer view all of which facilitate us to deliver a loan in-principle approval in 60 minutes to the customer.

We have developed proprietary technology platform for each distribution channel which are customized to support various business needs, such as:

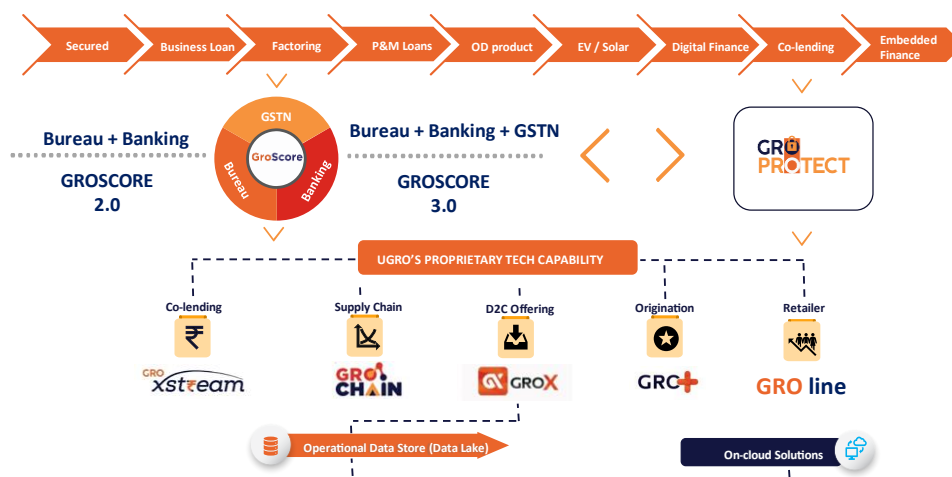

GRO Plus: Supports our branch-based business and is designed to support customers onboarded in metro cities through intermediaries. It has completely integrated every element of underwriting digitally (using all conventional parameters).

GRO X: Platform built to allow non-intermediated loan applications from eligible MSMEs. Our GRO X app allows MSMEs to directly apply for loans through their mobile phones.

GRO Xstream: It is currently being used for onward co-lending with Banks and NBFCs. It is intended to evolve into a marketplace powered by our BRE, connecting asset originators with liability partners. It currently allows seamless API integration with our co-lenders, allowing the company to reduce turnaround time and bring in efficiencies in the entire process.

We have a system architecture to fully support our SME lending. Please see the following:

Our Strengths

Technologically advanced operating model and Credit Approach

Technology is at the core of our operations and we have adopted a well-defined IT strategy since our inception. We have adopted a sectoral lending approach to identify homogeneity among the heterogeneous MSME segment. We juxtaposed cash flow-based banking analysis and repayment behavior of MSMEs to the sector in which they operate to develop our proprietary AI / ML based scoring model GRO Score. GRO score is built on the tripod of data i.e., banking, bureau and GST to analyze 25,000+ data points and deliver < 60 mins credit decisioning.

Diversified borrowing profile and Effective asset-liability management

We have developed analytics-led, early warning systems by capitalizing data across macro (industry level consumption, regulatory/policy changes, social/demographic changes) and micro/customer indicators (Credit score movement, defaults in loans with other lenders, customer enquiries/new loans taken) to drive collection efforts.

Competition

The financial services industry is highly competitive and we expect competition to intensify in the future. We face competition in the lending business from domestic and international banks as well as other NBFCs, fintech lending platforms and private unorganized lenders. Banks are increasingly expanding into retail loans in the rural and semi-urban areas of India. We are exposed to the risk that these banks continue to expand their operations into the markets in which we operate, which would result in greater competition and lower spreads on our loans. In particular, many of our competitors may have operational advantages in terms of access to cost-effective sources of funding and in implementing new technologies and rationalising related operational costs.

Insurance

We maintain a director's and officers' liability policy covering our directors and officers against claims arising out of legal and regulatory proceedings and monetary demands for damages. We also maintain a group personal accident and business travel accident policy for our employees. These insurance policies are generally valid for a year and are renewed annually.

Laws in relation to Non-Banking Financial Companies

A. The Reserve Bank of India Act, 1934 (the “RBI Act”)

The RBI is entrusted with the responsibility of regulating and supervising the activities of Applicable Non-Banking Financial Companies (“NBFCs”) under the RBI Act. The RBI Act defines an ‘NBFC’ as:

- (I) a financial institution which is a company;
- (II) a non-banking institution which is a company and which has as its principal business of receiving of deposits, under any scheme or arrangement or in any other manner, or lending in any manner; or
- (III) such other non-banking institution or class of such institutions as the RBI may, with the previous approval of the Central Government and by notification in the official gazette, specify.

As per the RBI Act, a financial institution is a non-banking institution, carrying on as whole or part of its business, inter alia, the financing of activities other than its own, by making loans, advances, or otherwise; the acquisition of shares, stock, bonds, debentures, securities issued by the Government or other local authorities or other marketable securities of like nature; or letting or delivering goods to a hirer under a hire-purchase agreement.

The RBI has, through a press release dated April 8, 1999, clarified that in order to identify a particular company as an NBFC, it shall consider both the assets and the income pattern as evidenced from the last audited balance sheet of the company to decide its principal business. A company shall be treated as an NBFC if its financial assets are more than 50% of its total assets (netted off by intangible assets) and income from financial assets is more than 50% of its gross income. Both these tests are required to be satisfied as the determinant factors for the principal business of a company.

NBFCs are not permitted to commence or carry on the business of a non-banking financial institution without obtaining a certificate of registration (“CoR”) from the RBI. Further, every NBFC is required to submit to the RBI a certificate from its statutory auditor within one month from the date of finalization of its balance sheet and in any case not later than December 31st of that year, stating that it is engaged in the business of non-banking financial institution requiring it to hold a CoR. The RBI Act makes it mandatory for every NBFC to get itself registered with the RBI in order to be able to commence any of its activities.

An NBFC may be registered as a deposit-taking NBFC (“NBFC-D”) or as a non-deposit taking NBFC (“NBFC-ND”). Our Company has been classified as a systemically important non-deposit taking NBFC.

B. Regulatory Requirements of an NBFC under the RBI Act

(I) Net Owned Fund

The RBI Act, read with an RBI notification dated April 20, 1999, provides that to carry on the business of an NBFC, an entity would have to be registered as an NBFC with the RBI and would be required to have a minimum net owned fund of ₹ 200 lakh. For this purpose, the RBI Act has defined ‘*net owned fund*’ to mean:

- i. the aggregate of the paid-up equity capital and free reserves as disclosed in the latest balance sheet of the company, after deducting:
 - A. accumulated balance of losses;
 - B. deferred revenue expenditure;
 - C. other intangible assets
- ii. further reduced by the amounts representing:
 - A. investment by such companies in shares of:
 - a) its subsidiaries;
 - b) companies in the same group; and
 - c) other NBFCs.
 - B. the book value of debentures, bonds, outstanding loans and advances (including hire purchase and lease finance) made to, and deposits with:
 - a) subsidiaries of such company; and
 - b) companies in the same group, to the extent such amount exceeds 10% of point i above.

(II) Reserve Fund

In addition to the above, the RBI Act requires NBFCs to create a reserve fund and transfer therein a sum of not less than 20% of its net profits earned annually, as disclosed in the statement of profit and loss, before declaration of dividend. E. Laws in relation to the recovery of debts

(I) Insolvency and Bankruptcy Code, 2016 (the “IB Code”)

The IB Code primarily enables time-bound reorganisation and insolvency resolution of debtors. The primary objectives of the IB Code are:

- (a) to consolidate and amend the laws relating to reorganisation and insolvency resolution of corporate persons, partnership firms, and individuals in a time bound manner for maximisation of the value of assets of such persons;
- (b) to promote entrepreneurship, availability of credit and balance the interests of all the stakeholders, including alteration in the order of priority of payment of Government dues; and
- (c) to establish an Insolvency and Bankruptcy Board of India.

The IB Code specifies two different sets of adjudicating authorities to exercise judicial control over the insolvency and liquidation processes:

- (a) In case of companies, limited liability partnerships and other limited liability entities, National Company Law Tribunals (“**NCLT**”) shall act as the adjudicating authority; and appeals therefrom shall lie with the National Company Law Appellate Tribunal (“**NCLAT**”).
- (b) In case of individuals and partnerships, Debt Recovery Tribunal (“**DRT**”) shall act as the adjudicating authority and appeals therefrom shall lie with the Debt Recovery Appellate Tribunal (“**DRAT**”).

The Supreme Court of India shall have appellate jurisdiction over NCLAT and DRAT.

The IB Code governs two corporate insolvency processes, i.e. (i) insolvency resolution; and (ii) liquidation:

- (a) **Insolvency resolution:** Upon a default by a corporate debtor, a creditor or the debtor itself may initiate insolvency resolution proceedings. The IB Code prescribes a timeline of 180 days for the insolvency resolution process, subject to a single extension of 90 days, during which there shall be a moratorium on the institution or continuation of suits against the debtor, or interference with its assets. During such period, the creditors and the debtor will be expected to negotiate and finalise a resolution plan, with the assistance of insolvency resolution professionals to be appointed by a committee of creditors formed for this purpose. Upon approval of such a plan by the adjudicating authority, the same shall become binding upon the creditors and the debtor.
- (b) **Liquidation:** In the event that no insolvency resolution is successfully formulated, or if the adjudicating authority so decides, a liquidation process may be initiated against the debtor. A liquidator is appointed, who takes the assets and properties of the debtor in his custody and verifies claims of creditors, selling such assets and properties and distributing the proceeds therefrom to creditors.

The bankruptcy of an individual can be initiated by the debtor, the creditors (either jointly or individually) or by any partner of a partnership firm (where the debtor is a firm), only after the failure of the Insolvency Resolution Process (“**IRP**”) or non-implementation of repayment plan. The bankruptcy trustee is responsible for administration of the estate of the bankrupt and for distribution of the proceeds on basis of the priority set out in the Code.

In addition, the IB Code establishes and provides for the functioning of the Insolvency and Bankruptcy Board of India (“**IBBI**”) which functions as the regulator for matters pertaining to insolvency and bankruptcy. The IBBI exercises a range of legislative, administrative and quasi-judicial functions, inter alia, in relation to the registration, regulation and monitoring of insolvency professional agencies, insolvency professionals and information utilities; publish information, data, research and studies as may be specified; constitute committees as may be required; and make regulations and guidelines in relation to insolvency and bankruptcy.

While the IB Code does not apply to financial service providers such as the Issuer, Section 227 of the IB Code authorises the Central Government to notify financial service providers or categories of financial service providers for the purpose of their insolvency and liquidation proceedings being conducted under the IB Code. Pursuant to the notification no. S.O. 4139(E) dated November 18, 2019 issued by the Ministry of Corporate Affairs read with Section 227 of the IB Code and the Insolvency and Bankruptcy (Insolvency and Liquidation Proceedings of Financial Service Providers and Application to Adjudicating Authority) Rules, 2019, non-banking financial companies (including housing financial companies) with asset size of at least ₹ 500,00,00,000 (Indian Rupees Five Hundred Crore) have been notified for the purpose of their insolvency and liquidation proceedings being conducted under the IB Code.

(II) **Recovery of Debts due to Banks and Financial Institutions Act, 1993 (“Debts Recovery Act”)**

The Debts Recovery Act provides for establishment of DRTs for expeditious adjudication and recovery of debts due to a bank or financial institution, or a consortium of banks or financial institutions. The Debts Recovery Act is only applicable to such debts as are for a sum that is greater than ₹ 1 million, or in the case of particular debts that the Central Government may specify, greater than ₹ 0.1 million. A DRT established under the Debts Recovery Act exercises jurisdiction over applications from banks and financial institutions for the recovery of debts due to them, and no court or other authority can exercise jurisdiction in relation to matters covered by the Debts Recovery Act, except the higher Courts in India in certain circumstances. The Debts Recovery Act also provides for the establishment of DRATs, and any appeal from any order of a DRT lies with a DRAT. Further, the Debts Recovery Act provides for the procedure to be followed in proceedings before a DRT or DRAT.

(III) **Securitisation and Reconstruction of Financial Assets and Enforcement of Security Interest Act, 2002 (“Securitisation Act”)**

The Securitisation Act grants certain special rights to banks and financial institutions to enforce their security interests upon non-payment of a secured debt. The Securitisation Act provides that a secured creditor may, in the case of a default in payment of a debt or an instalment thereof, classify the account of the borrower as an NPA, and give notice in writing to the borrower requiring it to discharge its liabilities within 60 days, failing which the following rights accrue to the secured creditor:

- (a) taking possession of the assets constituting the security for the loan, including the right to transfer the assets by way of lease, assignment or sale of the asset;
- (b) taking over the management of the business of the borrower, including the right to sell or otherwise dispose of the assets, in case a significant portion of the debtor’s business is held as security;
- (c) appointment of a manager to manage the secured assets; and
- (d) requiring that any person who has acquired any of the secured assets from the borrower and from whom any money is or may become due to the debtor, to pay the secured creditor instead.

Where a secured creditor seeks to take a secured asset into its possession or sell or transfer the same under the provisions of the Securitisation Act, the secured creditor may make a written request to the Chief Metropolitan Magistrate or the District Magistrate within whose jurisdiction the secured asset or relevant documents may be situated or found. Upon such request, the Chief Metropolitan Magistrate or District Magistrate may take possession of such assets and/or relevant documents and forward the same to the creditor, using or directing the use of such force as may be necessary. In addition, the secured creditor may file an application before a DRT or a competent court for recovery of balance amounts, if any, and may take any other measures for the recovery of debts.

Further, the Securitisation Act provides for the creation of a central database by the Central Government for recording rights over any property or creation, modification or satisfaction of any security interest thereon. This registry is to be integrated with registration records under various central registrations, including the Companies Act, 2013, the Registration Act, 1908 and the Motor Vehicles Act, 1988. Any registration of transactions for creation, modification or satisfaction of security interest by a creditor or filing of attachment orders shall be deemed to constitute a public notice. Where a security interest or attachment order upon property in favour of a creditor is filed for registration, the claim of such creditor has priority over any subsequent security interest, transfer or attachment order upon the property.

In addition, the Securitisation Act regulates ‘asset reconstruction companies’, which are companies intended to carry on the business of securitisation or asset reconstruction. An asset reconstruction company, upon being registered by the RBI, may acquire the financial assets of a bank or financial institution, whereupon it shall be deemed to become the lender in place of the bank in relation to such financial assets, and all rights of the bank or financial institution in relation to such financial assets shall vest in the asset reconstruction company. For the purposes of asset reconstruction, an asset reconstruction company may inter alia provide for the management of the business of a borrower (including a change in or takeover of its management), sale or lease of the business of a borrower, rescheduling payment of debts, settlement of dues, enforcement or possession of security interests, or conversion of debt of a borrower into shares.

Further, NBFCs shall exercise on-going due diligence with respect to the business relationship with every client and closely examine the transactions in order to ensure that they are consistent with their knowledge of the client, his business and risk profile and where necessary, the source of funds.

Accordingly, pursuant to the office memorandum dated June 5, 2017, issued by the Department of Economic Affairs, Ministry of Finance, approval of foreign investment under the FDI policy has been entrusted to ministries / departments concerned. Subsequently, the Department of Industrial Policy & Promotion (“DIPP”) issued the Standard Operating Procedure for Processing FDI Proposals on June 29, 2017 (the “SOP”). The SOP provides a list of the competent authorities for granting approval for foreign investment for sectors/activities requiring Government approval. For sectors or activities that are currently under automatic route but which required Government approval earlier as per the extant policy during the relevant period, the administrative ministry/department concerned shall act as the competent authority (the “Competent Authority”) for the grant of post facto approval of foreign investment. In circumstances where there is a doubt as to which department shall act as the Competent Authority, the DIPP shall identify the Competent Authority. The DIPP has from time to time made policy pronouncements on FDI through press notes and press releases which are notified by RBI as amendment to FEMA. In case of any conflict, FEMA prevails.

The Consolidated FDI Policy consolidates the policy framework in place as on October 15, 2020. Further, on January 4, 2018 the RBI released the Master Direction on Foreign Investment in India (updated from time to time). Under the approval route, prior approval from the FIPB or RBI is required. (IV) Information Technology Act, 2000 and the rules made thereunder (“IT Act”)

The primary objective behind enacting the IT Act is to confer legal recognition upon electronically conducted transactions. This legislation supports electronic commerce by acknowledging contracts concluded through digital means, safeguarding intermediaries regarding third-party information, and establishing liability for the inadequate protection of sensitive personal data. It introduces mechanisms for authenticating electronic documentation through digital signatures and stipulates civil and criminal liability, including fines and imprisonment, for various offenses. An amendment in 2008 legalized the validity of contracts formed electronically. The IT Act outlines offenses such as unauthorized access to computer systems, unauthorized disclosure of confidential information, and fraud originating from computer applications. It grants the Government of India the authority to intercept, monitor, or decrypt information for the nation’s sovereignty, integrity, defense, and security. Additionally, the IT Act empowers the government to formulate rules pertaining to electronic signatures, reasonable security practices, procedures, and sensitive personal data.
